“The first ever FDI Annual World Dental Congress to be held in Thailand”

A welcome message by FDI President Dr Tin Chun Wong

Welcome to FDI 2015 Bangkok, an event that has generated a great deal of excitement ever since its launch in New Delhi last year. The theme for this year's event is 'Dentistry in the 21st Century' and much of the vital equipment and material is on display in this year's sold-out exhibition, which will offer 5,500 square metres net of the latest in high-end technology and cutting-edge products. This does not come as a surprise. Current market research places growth in the Thai medical device market (including dental equipment, especially high-end) at an attractive 13.7% per annum in the medium term, to reach around US\$ 2.3 billion by 2018.

We are delighted to announce a record-breaking six national exhibition reservations, so look out for some thrilling moments in the German, United Kingdom, United States, Chinese and, for the first time, Italian and Indian pavilions.

I would also recommend you visit the FDI pavilion, where you can gain a special insight into the latest updates on ongoing activities and details of emerging areas of focus and their corresponding projects. You will also see a report on the 2015 edition

of World Oral Health Day, held 20 March, as well as highlights on new products such as the 2nd edition of FDI's landmark Oral Health Atlas, due for official launch during the congress.

FDI World Dental Federation serves as the principal representative body for more than one million dentists worldwide, through approximately 200 national member associations and specialist groups in some 130 countries. The Annual World Dental Congress has been FDI's flagship event for well over 100 years, promoting international understanding and exchange of knowledge and experience in dentistry, challenging preconceived ideas and widening perceptions.

This is the first ever FDI Annual World Dental Congress to be held in Thailand. I would like to thank our partners, the Dental Association of Thailand, for putting together such an exceptional event. Cooperation between FDI and the local team has been, I'm told, in every way exemplary. I would like to congratulate the local organising committee for lining up such an impressive group of 17 national and 63 international speakers from all continents of the world to deliver a truly exceptional choice of lectures.

During the congress, we will also be highlighting some of major issues facing dental practitioners, in particular, and health services in general. One of these is improving access to oral health care, within the context of oral health as a fundamental right. Another is oral health care for ageing populations, which will be the subject of this year's World Oral Health Forum under the title 'Challenges of oral health care in an ageing society'.

Thailand itself is rapidly gathering a reputation for excellence in the field of dentistry, attracting patients from around the world and taking the lead in areas such as access to oral health care, caries prevention and minimal intervention dentistry. Moreover, the country has the particularity of having a ratio of 2:1 of female-to-male dental graduates entering the workforce.

I sincerely hope that congress participants will have the opportunity to visit the natural and cultural gems of Bangkok and Thailand during their stay. Among other things, the country has five World Heritage Sites.

On behalf of FDI, welcome to the most significant international dental event in this year's calendar, the 2015 FDI Annual World Dental Congress.

Situation in Bangkok secure despite attacks, FDI and TDA say

On 17 August, a pipe bomb exploded at the Ratchaprasong intersection in central Bangkok close to the Erawan Shrine, killing at least 20 people and leaving more than 120 injured. In view of the upcoming FDI Annual World Dental Congress, which will be held in the Thai capital from 22

to 25 September, the FDI World Dental Federation has reacted immediately and sent a team to the Thai capital in order to assess the situation.

“We are happy to announce that the Thai government has taken swift and effective action and the

situation has returned to normal,” the federation stated. The Dental Association of Thailand, the local partner of this year’s FDI AWDC, commented on the bombings as well: “Following recent events in Bangkok, the Dental Association of Thailand has been in contact with the Government of Thailand. We

have received assurances that special security measures are now in place and will remain so throughout the period leading up to the FDI Annual World Dental Congress and beyond.”

“For the Dental Association of Thailand, the security and comfort

of congress participants are an absolute priority. We are convinced that the measures now in place will ensure that your stay in Bangkok will be both safe and enjoyable,” the organisation added.

The Erawan Shrine, dedicated to the Hindu god Brahma, is a popular destination for both tourists and locals. Close to the intersection where the bomb detonated are top hotels, shopping malls and offices. Thus, several tourists were among the victims, mostly from South and East Asia, although not all of the victims have been identified yet.

The bombing was one of the worst attacks in the Thai capital in years. Authorities are still searching for a suspect identified as the potential bomber through surveillance footage and to date, it is still unclear who might be responsible for it and what the possible motives are, according to the Thai Ministry of Foreign Affairs. However, Thai authorities currently believe that the goal of the attack was to affect Thailand’s tourism industry, as Defence Minister Prawit Wongsuwan told Reuters. The news agency reported that authorities have stepped up security checks at some major city intersections and in tourist areas.

Following the attack, the Bangkok police reported a further small explosion. A bomb was thrown into the Chao Phraya river beneath the Taksin bridge, under which passenger ferries pass. However, nobody was hurt. The police suspect that the two attacks might be linked.

Currently, they are looking for a young man wearing a yellow shirt who was captured on a surveillance camera leaving his backpack inside the fence of the Erawan Shrine. The explosion occurred minutes after the man left the shrine, making him the police’s prime suspect.

Two days after the bombing, the Erawan Shrine was reopened to visitors, as the surroundings and the shrine itself have already been largely restored.

Several foreign offices, including in the UK and Germany, have updated their safety information for travellers going to Thailand. They urge visitors to take extra care and monitor travel alerts and news reports. According to them, further attacks—especially in tourist regions—cannot be ruled out.

THE DWX-4W PLUS
EXCITING NEW
DEVELOPMENTS IN
ROLAND DENTAL
TECHNOLOGY

Reliable and Affordable Wet Milling

THE NEW
DWX-4W Wet Dental Mill

The New DWX-4W Wet Milling Machine

The new DWX-4W Wet Dental Mill is an affordable and reliable restoration option that goes beyond dry milling to quickly and precisely cut glass ceramic and composite resins. It offers high-speed production of up to three pin-type blocks at a time and combines 4-axis undercut milling with a 4-station automatic tool changer. Combine the new DWX-4W with the DWX-50 or DWX-4 dry milling machine to offer a complete, uninterrupted restoration solution. Backed by a comprehensive 3 year warranty and drawing on over 30 years of engineering technology, Roland DWX devices are a proven solution with over 3000 Roland dental milling devices in the market today.

Visit stand BD239 at FDI 2015 to see the DWX-4W and exciting new developments in Roland dental technology. Learn more at www.rolanddg.com.au/dwx4w or speak to an Authorised Dental Dealer.

FDI schedules two sessions of its landmark World Oral Health Forum

Meetings to focus on sugar reduction and Universal Health Coverage

FDI introduced its innovative landmark World Oral Health Forum for the first time at the 2012 Annual World Dental Congress in Hong Kong. Since then, the objective has been to guarantee top-level panellists and subjects at the cutting edge of public policy in the field of oral health and related issues. This year is no exception, with two sessions scheduled for the upcoming AWDC in Bangkok.

Session 1 will focus on sugar as a significant risk factor for dental caries and other NCDs in the light of the recently-published World Health Organisation (WHO) Guideline on Sugar Intake for Adults and Children, recommends a reduction in daily intake of free sugars to less

than 10% of their total energy intake.

It also advises that a further reduction to below 5% or roughly 25 grams (six teaspoons) per day would provide additional health benefits.

The session will be moderated by Dr HS Selikowitz, Vice Chair of the FDI Science Committee, with panellists Dr Chizuru Nishida, Coordinator, Nutrition Policy and Scientific Advice Unit, Department of Nutrition for Health and Development, WHO; Prof. Paula Moynihan, Professor of Nutrition and Oral Health and Director of the Centre for Oral Health Research at Newcastle University UK and Director of its WHO

Collaborating Centre for Nutrition and Oral Health; Dr Rob Beaglehole, Principal Dental Officer and Senior Dentist for the Nelson Marlborough District Health Board (NMDHB) in New Zealand, member of the NZDA political lobby group and is Tobacco Control Advisor to the NZDA; and Ms Modi Mwatsama (UK) a Registered Nutritionist and Director for Global Health at the UK Health Forum where she leads on NCDs and global health policy.

Session 2 of the World Oral Health Forum 2015 is entitled 'Universal Health Coverage (UHC); towards optimal oral health'. It will highlight efforts made by emerging economies and low and middle income countries to achieve UHC and

a roadmap which could be used to integrate oral health into UHC within the context of the post-2015 development agenda.

The session is moderated by Prof. Michael Glick, Professor, Oral Medicine and Dean, School of Dental Medicine, University of New York at Buffalo, USA, who will address the Forum on *What do we mean by optimal oral health?* Panellists include Professor David Williams, Professor of Global Oral Health, Bart's and The London School of Medicine and Dentistry, London, UK, who will speak on *UHC and how oral health fit into it*; and Dr Manu R. Mathur, Research Scientist and Adjunct Assistant Professor at Public Health Foundation of India (PHFI), New Delhi,

FDI World Oral Health Forum 2015 – Rooms 202/203

- **Session 1:**
New WHO Guideline on Sugars intake for adults and children.

- **Session 2:**
Universal Health Coverage (UHC); towards optimal oral health.
Thursday 24 (9:30 – 12:45)

India, whose focus will be *UHC in Emerging Economies: Roadmap to Achieve Optimal Oral Health*.

Asia's first dental museum opens in Bangkok

Permanent exhibition at Mahidol University aims to help improving understanding of the importance of good dental health

With the newly opened Sirindhorn Dental Museum, the Faculty of Dentistry at Mahidol University in Bangkok has introduced the first dental museum of its kind in Asia. By highlighting the history of dentistry and oral hygiene across Asia through fun and interactive exhibits, the museum hopes to raise awareness in the country about the importance of proper oral care.

The 620 square metres museum, which is sponsored by the royal family, features five main exhibits, each aimed at improving understanding of the importance of good dental health.

"We want to ensure that Thais will have a healthy smile in our 'Land of Smiles' for as long as possible," Dr Phira Sithiamnuai, assistant professor and Deputy Dean for Collaboration and Networking at

Associate Professor Supatra Thongrungrakiat (left), Deputy Dean for Finance and Assets at Mahidol University, and Associate Professor Passiri Nisalak from the Faculty of Dentistry at the opening of the Sirindhorn Dental Museum. (Photo Mahidol University, Thailand)

the faculty, told the Bangkok Post. "Our goal for the museum is to encourage Thai children to understand the importance of oral health in an entertaining way. We hope that learning with fun will inspire

people to make healthy choices about their oral health."

A highlight for children is the giant model of a mouth. Assisted by the staff, visitors are encouraged to practise their toothbrushing skills on the huge teeth with equally giant toothbrushes. Other interactive items are a 3-D human model that shows how oral health can affect the overall well-

Many Thais, especially people in remote areas, lack access to basic oral health care. As reported online by the *Bangkok Post*, Sithiamnuai remarked that the dentist per capita ratio in the capital is 14 times higher than in the north-east of the country, for example.

According to figures from the Bureau of Dental Health, Thailand

being, as well as several multimedia displays on dental science.

Furthermore, the exhibition takes a closer look at the history of dentistry throughout China, India and Thailand, including collections of dental materials and tools, as well as information on dental statistics, and even a prehistoric human skeleton that features traces of unnaturally modified teeth.

has just 11,607 dentists. This translates to a dentist-population ratio of approximately 1:5,533, compared with an average of 1:2,000 in most developed countries.

The Sirindhorn Dental Museum is located at the HRH Princess Maha Chakri Sirindhorn 50th Anniversary Building at the university's Phayathai campus and is free of admission.
