Irish fun is on tap at the 2016 Pacific Dental Conference

Vancouver-based event is packed full with C.E., a sold-out exhibit hall and lively social events

More than 150 open sessions and hands-on courses, six sessions of live dentistry, lively social events and an exhibit floor with more than 300 companies in 600 booths will be available to attendees of the Pacific Dental Conference. The event runs from Thursday, March 17, through Saturday, March 19.

The annual gathering in Vancouver, British Columbia, in recent years has been attracting more than 12,500 dental professionals, making it one of the largest dental conferences in North America.

Held in the Vancouver Convention Centre, on the Vancouver Harbour waterfront, the meeting can claim one of the most magnificent settings for a dental conference, with backdrops that include the busy harbor, an expansive Vancouver skyline and the snow-covered peaks towering above North Vancouver.

Live dentistry on the exhibit floor

The exhibit floor will be open from 8:30 a.m. to 5:30 p.m. on Thursday and Friday, March 17 and 18, with live dentistry sessions running throughout both days, sponsored by Sinclair Dental and Adec.

On Thursday:

- At 9 a.m., Bernard Jin, DMD, presents "Immediate anterior implant solutions with ridge augmentations using innovative PRF applications" with commentary by Dr. Mark Kwon, cosponsored by Hiossen Implant Canada.

- At 11:30 a.m., Ho-Young Chung, DDS, presents "Immediate implant denture solution with extractions, PRF, immediate implant placement and immediate loading" with commentary by Dr. Mark Kwon, cosponsored by Hiossen Implant Canada.

- At 2 p.m., Alan Lowe, DMD, Dip Ortho, PhD, FRCD(C), presents "Clinical techniques for sleep apnea therapy with oral appliances" cosponsored by Aurum Group.

On Friday:

- At 8:30 a.m., Peter Walford, DDS, FCARDP, presents "Can't place implants? Take a look at the inlay/flange bridge and what it can do."

- At 11 a.m., Sonia Lezly, DDS, Dipi Perio, FCDS(BC), FRCD(C), presents "Immediate implant placement and transitional restoration — 5 key steps for success," cosponsored by BioHorizons Canada.

- At 1:30 p.m., David Chong, DDS, and Brandon Kang, DDS, DMD, MD, present "Lateral and crestal

10 facts about dental implants

By Sebastian Saba DDS, Cert. Pros.,
FADI, FICD, Editor in Chief

Dental implant marketing often emphasizes “simplicity,” underplaying an inherent complexity in the product, procedure — and patient. Prosthetic dentistry is not simple. And patients rarely have simple problems. Potential complications can be far from simple to correct. To ease your learning curve with implant dentistry, following are some core variables that can be managed based on proven research.

1 *Implant surface design:* Choose implants that have micro-topography and bioactive surfaces that enhance bone contact and have macro-topography (overall shape) that better stabilizes bone profiles with little or no crestal bone loss.

2 *Abutment connections:* Internal connections have simplified abutment insertion. And if the abutment-implant margin is kept shy of the implant outer surface, a connective tissue zone will develop. The result is improved bone preservation at the crest. Abutments should be torqued to position and have specifically designed abutment screws that support long-term stability.

3 *Provisionalization phase:* Once thought optional, today this step is a critical diagnostic and management tool used to verify osseointegration, occlusion, esthetics, soft-tissue management, hygiene, prosthetic design and abutment selection.

4 *Prosthetic options — screw vs. cement:* Some companies emphasize a “simpler” and familiar cement-only option. But irretrievability — presence of subgingival cement — can be problematic. Plan your design to minimize complications.

5 *Earlier osseointegration and restorative phases:* Improved implant surfaces and shapes support primary stability in bone and enhanced osseointegration. Early loading is becoming more feasible — choose cases carefully.

6 *Soft- and hard-tissue management:* Timely placement of provisionals can influence the support and contour of tissue. Advancements in bone grafting and tissue preservation help preserve soft tissue, maintain anatomical bone contour and improve gingival esthetics.

7 *Enhanced marketing:* Implant dentistry is aggressively promoted. However, costs remain high for average-income patients. It's critical that benefits a patient realizes far outlast any corresponding debt.

8 *Technological improvements:* Zirconia ceramics and CAD/CAM have created an explosion in design, customization and improved esthetics. Zirconium is doing for esthetics what titanium did for osseointegration.

Photo/Dr. Sebastian Saba

9 *Computer-guided implant therapy:* You can't deny the value of 3-D software that helps measure and locate vital structures such as the mandibular nerve, sinus cavities and nasal floor. But most practices still rely primarily on conventional radiography.

10 *Long-term studies:* Implant companies provide education, solid research and ongoing support to customers (you). Incorporating up-to-date knowledge into the clinical variables you're managing on a daily basis will enable you to achieve a predictable approach in your decision-making with dental implants.

SEBASTIAN SABA, DDS, CERT. PROS., FADI, FICD, is a graduate of the Goldman School of Dental Medicine, Boston University. He has published extensively on the topics of prosthetic and implant dentistry and has a private practice in Montreal limited to prosthetic and implant dentistry.

Always a top draw at the Pacific Dental Conference, this year's live-dentistry stage in the exhibit hall features three live-patient demonstrations on each of the two days that the exhibit hall is open. Pictured is a 2014 session. Photo/Provided by Pacific Dental Conference

◀ PDC, page A1

sinus surgery,” cosponsored by Hiossen Implant Canada.

The live dentistry stage, located in the exhibit hall, is open to all attendees. The start times are subject to change, so it's worth confirming through the PDC app or the latest Conference at a Glance to access the most current schedule. To get the PDC 2016 Mobile App, point your mobile device's browser to <http://m.pdconf.com>.

If you have last year's app, it's worth removing it from your device because the PDC 2016 app is new — designed specifically for this year's conference.

With the first day of the conference falling on St. Patrick's Day, meeting organizers have planned a “Celtic Celebration” with a mixture of Canadian and Irish fun. The evening starts with a wine and beer tasting event. Beers will be provided by Parallel 49 Brewing, one of Canada's fastest-growing breweries, based in East

Vancouver. The wines are being assembled by “Wine Whisperer” David Lancelot, sourcing the selection from some of Canada's most talented winemakers. During the samplings, which also will feature buffet stations, live Celtic music will be provided by Tiller's Folly, who, as the evening progresses, will segue to tunes geared toward filling the dance floor. Tickets for the evening are \$50.

Cosmetic meeting reimaged for Toronto

American Academy of Cosmetic Dentistry's annual scientific session will be from April 28–30

Dental professionals from across the globe will be able to see the latest in dental products and services at the American Academy of Cosmetic Dentistry's annual scientific session, AACD 2016, which will be held in Toronto from April 28–30.

AACD 2016 is considered by many to be cosmetic dentistry's premier education event, with its hands-on workshops, lectures and social events catering specifically to professionals involved with cosmetic dentistry.

The AACD exhibit hall will be open all three days, featuring breakfasts, lunches and several cocktail receptions.

More than 1,500 dental professionals

are expected to attend the event, which will take place at the Metro Toronto Convention Center in downtown Toronto. While the exhibit hall is open to attendees of AACD 2016, those who aren't attending the meeting can still purchase products and services with daily passes.

Jeff Roach, director of strategic partnerships at AACD, said, "Our attendees look forward to the amazing products and services our exhibitors offer, and with several cocktail receptions and other activities planned, we anticipate plenty of foot traffic."

A new meeting structure is in place to deliver this year's educational offerings.

The conference will feature separate themes on each of the three days: design, implementation and realization.

Organizers describe the themes as being a scaffolding on which the entire conference will be structured. The three themes are designed as a sequential and cumulative process, with each day building on knowledge gained the previous day.

Billed as AACD Triple Plays, some of the themes will track as rapid-fire morning and afternoon sessions delivered by top-name speakers. Thursday's rapid-fire sessions will focus on treatment planning. Friday's "implementation" theme includes rapid-fire sessions on orthodontic

and surgical options. The "revitalization" theme on Saturday features rapid-fire sessions on restorative implementation.

In addition to the rapid-fire offerings, all of the courses at AACD 2016 are designed with the intent to elevate clinical skills of the entire dental team. The AACD event also will include a lineup of accreditation courses for attendees who seek to differentiate themselves at a level of excellence achieved by only the most dedicated and passionate dental professionals.

For more information and to register, you can visit www.aacdconference.com.

JDIQ features deep lineup of courses

The Journées Dentaires Internationales du Québec, the annual meeting of the Ordre des Dentistes du Québec, will be held in Montréal from Friday, May 27, through Tuesday, May 31.

The meeting typically attracts more than 12,000 delegates from around the world. Organizers describe the event as being the "world's most highly attended bilingual convention." The JDIQ offers a scientific program with more than 125 lectures and workshops presented in both English and French.

Featured speakers for this 46th edition of the meeting include Drs. Véronique Benhamou, Philippe Martineau, Marina Braniste, Matthieu Schmittbuhl, Gordon J. Christensen, Marie-Andrée Houle, Samer Abi Nader, Maude Albert and Nadia Rizkallah.

Session topics include cone-beam computed tomography, endodontics, lasers, dental photography, dentures, composites, challenging implant cases, advanced local anesthesia, dento-alveolar surgery, conservative dentistry, sleep apnea and embezzlement protection for practices.

More than 225 exhibitors will span 500 booths in the exhibit hall, which will be open on Monday and Tuesday, May 30 and 31. A continental breakfast will be available to early risers on both days, and a wine and cheese reception will close out each of the two days.

Many of the workshop courses have already sold out. Prospective attendees are encouraged to register as soon as possible at www.odq.qc.ca/convention.

You can download the free mobile app, JDIQ 2016, to your smart phone or tablet via the App Store or Google Play. Or you can access the app via the QR codes on the meeting website.

The meeting organizers look forward to seeing attendees in Montreal at the end of May, with their usual promise of beautiful summer weather.

Pediatric dentists heading to the River Walk

American Academy of Pediatric Dentistry scientific session will be from May 26–29 in San Antonio

The American Academy of Pediatric Dentistry annual session will be from May 26–29 at the Henry B. Gonzalez Convention Center on San Antonio's highly popular River Walk. Photo/Stuart Dee, provided by the San Antonio Convention & Visitors Bureau

The fun and history of Alamo City combine with top speakers and high-value C.E. at the American Academy of Pediatric Dentistry (AAPD) 2016 annual session. The event will be held from May 26–29 at the Henry B. Gonzalez Convention Center in San Antonio, Texas.

Online registration is open via www.aapd.org, with the cutoff for advanced registration set for April 4. You can use AAPD's online itinerary planner to find details on the scientific program, social events and other events in San Antonio.

Barbecue, hoedown, carnival rides

The welcome reception on Friday, May 27, will feature a family-friendly fiesta San Antonio style, with barbecue, southern hoedown and carnival rides for the kids.

The keynote speaker on Friday, May 27, will be Erik Wahl, an internationally recognized graffiti artist known for his high-energy, inspirational live performances. The best-selling author of the business book "UNThink" uses his on-stage painting as a visual metaphor to communicate his core message: encouraging organizations to achieve greater profitability through innovations and superior levels of performance.

Because attendees must register for the meeting prior to making meeting-block hotel reservations, attendees are encouraged to register early. There are a number of hotels in the AAPD block, including the Marriott Rivercenter (headquarters hotel), the Marriott Riverwalk, the Grand Hyatt San Antonio, the Hilton Palacio del Rio, the Residence Inn Alamo Plaza and the Westin Riverwalk. As you can tell from the hotel names, the convention center and hotels string the city's famed River Walk and its many restaurants, bars, shopping and entertainment venues.

A wide variety of other popular destinations are just blocks away in the heart of downtown San Antonio. All of the meeting's scientific sessions will take place at the Henry B. Gonzalez Convention Center.

Preconference course on esthetic restorations

The preconference course "Esthetic Pediatric Restorative Dentistry" will be presented by Kevin J. Donly, DDS, MS; William F. Waggoner, DDS, MS; Theodore P. Croll, DDS, MS; and Nasser Barghi, DDS on Thursday, May 26. The course will offer the most current esthetic pediatric restorative dentistry techniques with data available to support restorative regimens. Indications and contraindications will be presented. You can learn more about this course and the complete scientific program with the AAPD 2016 Online Itinerary Planner.
