More than magical

• Dr. Jaime Lozada, fourth from left, and Dr. Nicholas Caplanis, fifth from left, both past presidents of the AAID, celebrate at the AAID Welcome Reception on Wednesday night with the staff of Microdent Implant System. (Photo/Javier de Pison, *today* Staff)

By Kristine Colker, *today* Staff

■ It's a good time to be involved in implant dentistry. New techniques and technologies are changing the industry at a rapid pace. Things that weren't possible before – like growing human tissue – are now becoming a lot closer to reality.

This year's American Academy of Implant Dentistry's Annual Educational Conference, its 63rd, explores some of the magic that can be found not only in the new parts of implant dentistry but in the everyday parts as well.

On Wednesday, keynote speaker Dr. Nina Tandon gave us a peek into the future with her presentation, "Body 3.0," in which she described a future that is all about growing our own body parts. Following her session, there were even more glimpses into the future with Dr. Peter E. Murray's "Generation of Teeth Using Stem Cells" and Dr. Tomas Albrektsson's "Future of Biomaterials and Osseointegration."

MAGICAL *from page 1*

Thursday's sessions turned attention back to the present as digital dentistry took center stage. From not too long ago when the only X-rays were two-dimensional to today's systems that can capture a degree of accuracy, predictability and precision never before available, 3-D dentistry is offering a type of magic that can enhance one's practice.

Drs. Jay R. Beagle ("Digital Planning for the Implant Surgeon"), Frank L. Higginbottom ("Digital Implant Dentistry: New Technology for Teeth and Implants") and German Galluci ("Digital Approach to Implant Dentistry") were just three of the five speakers on hand to discuss how this new technology fits into implant dentistry and how you can make sure

Here at the AAID

Keep up with the meeting on your mobile device with AAID's new mobile application. Go to the Apple store or Android play store to download the app. Simply search for AAID.

In addition, be sure to mark your calendar for AAID's 64th Annual Implant Dentistry Educational Conference, being held Oct. 21-24, 2015, in Las Vegas. Stop by booth No. 110 to roll the dice and potentially win some money off your registration fee!

it works for you and not against you.

Today, the focus will turn to soft-tissue strategies as Dr. Serge Dibart discusses the piezo-implant, Dr. Anthony Sclar demystifies esthetic implant therapy and Dr. James Rutkowski gives an update on the

use of platelet-rich plasma and fiber and recombinant growth factors.

Of course, the main sessions aren't the only place magic is happening here at the AAID. The educational sessions are endless, including the concurrent sessions being held this afternoon. There are 10 different 90-minute programs that will be presented between 1:30 and 3 p.m. (See Page 8 for full details). Then after enjoying a refreshment and networking break from 3 to 4 p.m., you can choose a different program to attend from 4 to 5:30 p.m.

In addition, don't forget about the array of companies waiting for you in the exhibit hall. You can catch them all day long or during the designated networking and refreshment breaks from 9:30 to 10:30 a.m. today and Saturday and from 3 to 4 p.m. today.

Improve the gingival esthetics of your implant cases

NEW! Now using titanium custom healing components

The patient presented with a symptomatic and mobile maxillary right central incisor. Radiography indicated a horizontal root fracture, and the patient opted for implant treatment.

The titanium custom healing abutment was placed in order to mimic the gingival tissue contours of the original tooth and help maintain them during the healing phase.

Following four months of healing, the patient returned for the final impression. The custom healing abutment was removed, revealing anatomically correct contours that would facilitate an ideal emergence profile.

The final BruxZir® Solid Zirconia crown was cemented into place. Note how the interdental papillae created by the custom healing abutment allow for a natural emergence profile and ideal crown margins.

Clinical dentistry by Timothy F. Kosinski, DDS, MAGD

The Inclusive® Tooth Replacement System is a convenient and effective method of promoting and preserving the ideal tissue contours throughout the implant treatment process. It includes treatment options for these clinical situations:

- ◆ Single-stage implant placement with custom healing abutment
- ◆ Immediate loading with custom temporary abutment and BioTemps® provisional crown

INCLUSIVE® \$695* TOOTH REPLACEMENT SYSTEM

Complete single tooth replacement includes implant, drills, prosthetic stent, custom healing abutment, custom temporary abutment with BioTemps® provisional crown, custom impression coping, and final custom abutment and ceramic restoration.

*Price does not include shipping or applicable taxes.
Offer is valid only in the U.S.

INCLUSIVE® WARRANTY

With Inclusive, your entire restoration is covered for 20 years including the implant, the custom abutment AND the final crown. Even if you've used another company's implant, we've got you covered with a free Inclusive® Tapered Implant.

Master-Pin-Control

ALL YOU NEED!

Hybrid Pin System - developed with Dr. Istvan Urban

The Bone Management® system Master-Pin-Control is especially designed for the fixation of reabsorbable, non-reabsorbable and titanium membranes. Since the pins have an extra mini-thread, they are a hybrid between a screw and a pin. The sharp tip and the sturdy construction allow the pins to be inserted into very compact cortical bone. In addition, the pins can easily and safely be removed especially after a successful healing period due to its thread and unique head design.

*Kit complete with 34 pins

At a glance

- Fixation of membrane with pins
- Removal of pins and gentle tapping with pin holder
- Twist drilling can be performed depending on indication
- Placement of bleeding points with twist drill as required
- Pre-graining possible with rotating pilot drill hand instrument

AAID leads profession with Dental Industry Marketplace

■ The American Academy of Implant Dentistry's online Dental Industry Marketplace is a leading source of information for practitioners seeking to purchase services or supplies.

Available from a link on the AAID homepage, www.aaid.com, the Dental Industry Marketplace features industry-specific product and service listings designed to aid AAID members and the implant dentistry community with purchasing decisions.

The Buyers' Guide includes request for information (RFI) functionality that allows users to contact participating suppliers with a click of their mouse.

With a downloadable desktop search application available, visitors also have the ability to search for items directly from their desktops.
