Lots of smiles in Seattle

By Robert Selleck, *today* Staff

■ It's been 23 years since Seattle hosted the American Academy of Pediatric Dentistry annual meeting. The gathering back then was in a hotel conference center – and it was likely impossible for any of the attendees to imagine what things would look like the next time they got together in the Emerald City.

One of those attendees, Ed Moody, DDS, certainly wasn't imagining himself as president of the organization today. "It was never even on the radar," Moody said, while preparing for Friday morning's opening ceremony and awards presentations.

Twenty-three years ago, Moody had just earned his board certification and was attending his third AAPD annual meeting. This year, he's preparing to

More than 150 kids treated at Dental Home Day

• A young girl receives care on Wednesday as part of the AAPD annual meeting's Dental Home Day. (Photo/Michael Kardas)

By Robert Selleck, *today* Staff

■ More than 150 Seattle-area children in households otherwise unable to afford dental care received initial rounds of greatly needed treatment Wednesday thanks to Dental Home Day at this year's AAPD annual meeting.

The care will continue throughout the coming year, with the children receiving ongoing treatment from the Center for Pediatric Dentistry at the University of Washington (also the host site of Wednesday's event).

This is the third annual meeting during which AAPD members have donated their time and skills to provide

critically needed oral-health care to underserved children in the city hosting the annual meeting. The care is funded primarily by AAPD members through care grants and through the support of sponsor Sunstar Americas Inc.

About 60 AAPD dentists volunteered during Dental Home Day, which is a Healthy Smiles, Healthy Children (HSHC) program. HSHC is the charitable giving arm of the AAPD. You can learn more about HSHC and care grants in the AAPD booth, No. 517.

Since 2010, HSHC has donated more than \$3 million in support of Access to Care initiatives helping more than 290,000 children in 26 states.

SMILES *from page 1

hand off responsibilities to incoming president Rob Delarosa, DDS — who also was at that Seattle meeting 23 years ago.

"Almost a third of our membership is here this year," Delarosa said, commenting on how involved AAPD's members are. "We had more than 440 people in the preconference courses. The Joint Academic Day sold out. We're really encouraged by what we are seeing. It's going to be an exciting meeting."

With on-site registrations still climbing on Friday, the number of registrants had exceeded 5,500, including about 3,000 AAPD members.

Another sign of the organization's growing stature: More than 170 companies have booths in the exhibit

hall. Included among them is Parker Porter, launching the Silhouette low-profile nasal mask, in booth No. 717. NuSmile is a highly visible presence throughout the meeting, including its exhibit hall booth, No. 405. Preventech, in booth No. 421, can show you how its handpieces and attachments can help fast-paced pediatric practices reduce time spent on infection control, repairs and maintenance. Isolite, in booth No. 810, has dental isolation systems that are specifically designed for smaller mouths.

Beyond the exhibit hall, today's agenda is packed with educational opportunities and networking events. Keep in mind as you're conversing with fellow practitioners that the organization's president 20 years from now is likely among them.

Perhaps it's that perspective that

has Delarosa focusing on some of AAPD's younger members as he prepares for his term as president.

"We want to stay a vibrant and relevant organization," he said. "We need to look to the future."

Toward that end, Delarosa is interested in setting up a millennials task force.

"I'm very excited about this upcoming year," Delarosa said. "We have a strong foundation in place. We have a good and generous group of corporate sponsors who care about us — and care about the children. We're in a good position with advocacy programs."

But most important, Delarosa said, commenting again on the strong turnout for this year's meeting, "The academy is in a very strong position for the future because of our active and involved membership."

NOT EVERY JOB SAVES LIVES. YOURS CAN!

The Physiologic Approach to Treating SLEEP APNEA

Did you know that 80% of people with Sleep Apnea go undiagnosed and untreated?

Dentists role in treating Sleep Breathing Disorders is the Future of our Profession.

Learning Objectives

- Why treating sleep breathing disorders is important to your practice
- Why the PHYSIOLOGIC approach is not only the best way, but the only way you should be treating your patients for this disorder
- How to recognize the sleep disorder patient... things you are unaware of
- Your role in SBD treatment
- OSA and children
- Mandibular advancement device therapy, when and how
- Patient education and screening
- The physiologic bite technique... you'll use it on Monday
- How to incorporate dental sleep medicine into your practice
- The critical specifics of appliance delivery
- Advanced issues that no other program talks about
- The connection between OSA and TMD and how to co treat

Every doctor attending will receive, at no charge, a personal home scan for sleep apnea as well as an MAD for their own mouth.

2 Day Session • 8am-5pm • 16 CE Credits
Registration Fee: Doctor: \$995 • Team: \$595

Beyond cement.

Be confident in your choice.

Only the world leader in esthetic pediatric crowns could bring you the ultimate universal BioActive cement. If it's from NuSmile it's backed by thorough research, designed to deliver time saving efficiencies and high performance... all at an exceptional price. It's that simple.

It's CemBiotic!™

BioActive, Biocompatible, Hydrophilic, Antimicrobial

Unmatched Biological Benefits

- Releases calcium, phosphate and fluoride ions, maintaining a healthy oral environment
- Forms hydroxyapatite available to integrate with and replenish tooth structure
- No HEMA, Bis-GMA or BPA

Uncompromised Results

- Bond strength better than conventional cements
- Exceptionally easy Dual Cure handling
- Fast acting formula improves productivity

Force at Separation for Various Cements on Two Substrates
After 7 Days Storage in Saliva Substitute

Scenes from the AAPD

• Robert Chen, DDS, an orthodontist from Lakewood, Wash., learns about the BIOLASE Waterlase system in booth No. 909. Chen is in charge of the kids for the day (Elise, 5; Johnathan, 4; and Isabel, 5 months, in the baby carrier) while mom, Lotus Su, DDS, is in class all day. On the left is Darek Dohy, with Biolase, and to the right is Sean Cooper with Spinnaker Pediatric Dentistry.

• From left, Laurel Broadfoot with GumChucks at OralWise (booth No. 825) demonstrates GumChucks to Jennifer Vezina, the financial coordinator with York County Pediatric Dentistry in Kennebunk, Maine, and Kari Peterson, the practice's scheduler.

• James Hughes is ready to answer all your questions about the latest high-tech offerings from Planmeca in booth No. 330.

• The towering IDS display in booth No. 805 always attracts attention with its illustration of ways to create a fun design theme in your pediatric practice.

• In the Shofu booth (No. 301), Kathi Wearne displays the EyeSpecial C-II, the camera designed exclusively for dentistry.

• In the Preventech booth (No. 421), Jenny Reichert, RDH, holds up one of the giant dental mirrors that attract steady inquiries (you can get one with a qualifying order).

• Besides dental care there was also posing with mascots during Dental Home Day on Wednesday, held at the Center for Pediatric Dentistry at the University of Washington. (Photo/Michael Kardas)

• The Parker Porter booth (No. 717) is caught in a typically busy moment, with many people interested in the launch of the Silhouette low-profile nasal mask.

Photos by Robert Selleck,
todayStaff

• In the MacPractice booth (No. 800), from left: Robin Watkins, Brad Watkins, Doug Fenn and Eamonn Anderson.

• The NuSmile booth (No. 405) has a commanding presence at the main entrance to the exhibit hall.

• Be sure to make it all the way through the exhibit hall to see the My Kids Dentist Poster Research Competition. It's open again today from 9 a.m. to 5 p.m. (just like the exhibit hall).

• A big hit everywhere she goes, Flossie, the certified therapy dog, keeps Alan Golden, DDS, of Woodbridge, Va., busy answering questions about how Flossie keeps patients and staff calm at Golden's 10,000-square-foot practice.

• The balloon fairy, Jacqueline Brulotte, enthralls young visitors in the PedsExclusively booth (No. 727). Christopher Ingalls, DDS, of Lake Mary, Fla., is here with his wife, Jessica Ingalls, and children, from left, Marcella, 4, Nicole, 2, and Jace, 6.

• Incoming AAPD President Rob Delarosa, DDS, stops for a moment in the exhibit hall Friday after appointments in the Meet and Greet Mentor Lounge, where mentors help new dentists and residents get the most out of the annual meeting — and their dentistry careers.

• In the HiDow International booth (No. 325), Jasper Lewis Jr., DDS, of Greenville, N.C., is helped by Hadas Simhi of HiDow as he tries out one of the company's electronic muscle stimulators.

• From left, Nichol Schreiber and Brittany Painter in the Zooby booth (No. 331) report lots of interest in the popular Zooby by Denticator pediatric line of prophylaxis angles, paste, varnish and gloves.

Bioactive cement designed for pediatric use

By NuSmile Staff

■ Since its founding in 1991, NuSmile Crowns has sold more than 4 million preformed esthetic pediatric crowns worldwide. The company offers both Signature® pre-veneered, tooth-colored, stainless-steel crowns and NuSmile ZR zirconia crowns. NuSmile provides free zirconia try-in crowns to avoid saliva contamination and ensure proper bonding.

In 2014, NuSmile innovated yet again, launching BioCem™ Universal BioActive Cement, a biologically active cement designed for pediatric use. BioCem interacts with dentin,

Here in Seattle

delivering a beneficial effect to the tooth structure while also exhibiting antibacterial properties. It enables bio-mineralization by releasing both calcium and phosphate.

While glass ionomer (GI) and resin-modified glass ionomer (RMGI) cements deliver some bioactivity through fluoride release, these cements have been known to cause

AGD 2015 SAN FRANCISCO
a golden opportunity

June 18 to 21, 2015 Moscone West Convention Center www.agd2015.org

You're invited to:

- Experience cutting-edge continuing dental education
- Witness the latest in innovative technologies and treatment techniques
- Network with like-minded peers

Bring your entire dental team to San Francisco to get the most out of this experience for your practice!

With new enhancements and program offerings, AGD 2015 is one event you will not want to miss.

Register Today at
[www.agd2015.org!](http://www.agd2015.org)

sensitivity and exhibit washout at the margins over time. According to Dr. Ray Stewart, professor of pediatric dentistry, University of California San Francisco (UCSF) Medical Center: "While fluoride is very effective in promoting the remineralization of enamel, its effects are less pronounced in carious dentin, where calcium and phosphate are both necessary for apatite formation and integration. Resin cements have the same limitations, and recent studies have also linked resin cements to the role of MMP activation in caries progression and cement-to-dentin bond stability."¹

In contrast, according to the company, NuSmile's BioCem is the only cement – bioactive or otherwise – that releases calcium, phosphate and fluoride ions while also forming hydroxyapatite. A scientific study has documented BioCem's ability to facilitate the formation of hydroxyapatite, which is available to integrate with and replenish the dentin. In addition to exhibiting bioactivity, BioCem is biocompatible with the oral environment, containing no HEMA, BPA or BisGMA.

BioCem's many biological benefits do not require compromise of performance, according to the company. Its bond strength to zirconia and stainless-steel crowns is superior to traditional GI cements,² and it is also easy to handle, with a quick self-set time of two minutes. Excess cement at the margin can be tack cured with a curing light during the initial setting period and quickly cleaned up. Final cure can also be accelerated for zirconia crowns with a curing light, making BioCem well-suited for both zirconia and stainless-steel crowns.

(50% lighter than the old way)

(Even lighter...and you get this
\$450 low speed handpiece FREE*!)

For a limited time, we will give you an ēsamate low speed handpiece FREE* when you purchase one ēsa ST Economy Pack (1,000 disposable angles). So by spending around \$550, you get a state-of-the-art \$450 handpiece FREE!

Designed for fast-paced pediatric practices, the ēsamate handpiece increases efficiency by easing your infection control burden, which reduces changeover time between patients.

Since ēsa ST connects directly to the ēsamate handpiece, there's no need to sterilize straight nose cones, so you have more time for patient care. Consider the savings in pouches and plastic sleeves alone!

And the ēsa/ēsamate prophylaxis system helps ensure OSHA compliance in the hygiene room.

The lube-free ēsamate is super light, weighing just 2 ounces ... and it's backed by a 2-year warranty! So free yourself from wrist-fatigue ... from the infection control burden ... from the drudgery of sterilizing or repairing nose cones. Order the ēsamate prophylaxis system today to maximize the ergonomics and economics in your practice!

ēsamate
Low-Speed Handpiece

Take advantage of this FREE limited time offer by visiting us at AAPD Booth No. 421!

Make prophylaxis paste fun for kids with Next flavor menu

By Preventech Staff

■ Today's pediatric practices offer young patients the most appealing dental office experience ever, from a friendly staff to game centers in the waiting area and HDTV monitors

chairside. All of these resources go a long way toward putting the patient in a relaxed, comfortable state-of-mind as they prepare for their treatment.

However, once the actual procedure begins, young patients can become anxious again, especially if they have had a less than positive experience with something as simple as a bad tasting or extra gritty prophylaxis paste.

Since Next® Prophylaxis Paste offers a wide variety of great-tasting, kid-appelling flavors, it can help ensure the prophylaxis is enjoyable for every child. You can choose from 10 flavors: mint, bubblegum, cherry, tropical fruit, cinnamon, chocolate mint, watermelon, vanilla, grape and wintergreen.

There is even a non-flavored paste called Nada® Pumice Paste that's a dye-free, fluoride-free formula and perfect for flavor-intolerant patients or pit and fissure sealant preps. Best of all, Next Prophylaxis Paste is gluten-free and sweetened with xylitol.

To make it easier for you to offer more flavor choices, Next Prophylaxis Paste provides custom imprinted flavor menus. This gourmet menu is free to any practice, and no purchase is necessary. Next just asks that you specify at least three flavors since the idea is to offer patients' a choice.

Each menu is laminated and includes colorful flavor icons and fun flavor descriptions guaranteed to make your patients smile and thoroughly enjoy their prophylaxis experience. For example, Next bubblegum reads, "The most remarkable bubble, incredible bubble flavor ever!"

Next Prophylaxis Paste features a non-splatter, flash rinse formula that provides the user with smooth handling characteristics and excellent stain removal. Next is available in fine (pumice-free), medium, coarse and extra-coarse grits for all your cleaning and polishing needs.

To order your FREE menu, visit Preventech at booth No. 421, go online to www.preventech.com or call customer service toll-free at (800) 474-8681. Please allow four weeks for delivery.

To order Next Prophylaxis Paste, contact your favorite local dental dealer.

Here in Seattle

To learn more about Next Prophylaxis Paste or to order your free menu, stop by the Preventech booth, No. 421.

Next generation software for next generation pediatric dentistry

MacPractice DDS is the premier dental software developed for Macs. MacPractice integrates into your life and work interoperating with apps for iPad and iPhone and utilizing newly integrated online services your patients and staff will love, and next generation charting and integrated digital imaging you will love.

Your practice management and clinical software should enable you to run your practice effectively and affordably with confidence.

With Apple's 'legendary' reliability, ease of use, and minimal onsite maintenance cost, MacPractice features abilities not available in other, older software programs. Quite simply, MacPractice is better software, created, developed and supported by an actual software company with real engineers, programmers and developers.

MacPractice is built for the future... your future!
