Dentists love Boston!

• Meeting attendees visit the exhibit hall Friday morning. (Photos/Fred Michmershuizen, *today* Staff)

By Fred Michmershuizen, *today* Staff

■ With more than 450 exhibitors showcasing their products, services and technologies at the Yankee Dental Congress, there's something for everybody. Whether you are a general practitioner or a specialist, a budding newcomer or a seasoned veteran, one thing is certain: You will be sure to find something valuable on the exhibit hall floor here at the Boston Convention & Exhibition Center.

today stopped by a number of booths here in Boston to see what is new and exciting. Here is just a sampling:

At Shofu Dental Corp. (booth No. 1229), you can learn about the Bur-Butler, a bur storage system designed to bring both time and cost savings to your dental practice. Fully autoclavable and designed to grip all shank sizes, BurButler is made of resilient,

Preparing for the future

By Fred Michmershuizen, *today* Staff

■ More than 300 courses are being offered here at the 2016 Yankee Dental Congress. The Massachusetts Dental Society – in cooperation with the Connecticut, Maine, New Hampshire, Rhode Island and Vermont dental associations – has put together an educational program with some of the country's leading clinicians.

The theme of this year's meeting is "Navigating Our Future," and in the lecture halls there is plenty of education designed with that idea in mind.

Among the many noteworthy courses and workshops being offered today here at the Boston Convention & Exhibition Center are the following:

- "Clinical Treatment Planning and Problem Solving," presented by Dr. Robert A. Lowe, at 8 a.m. in Room 206B.

- "Simple and Predictable Tooth Movement," presented by Dr. Brooks Haney, at 1 p.m. in Classroom E on the show floor.

Check your show guide or download the YDC 2016 app for many more learning opportunities.

• Shannon Pace Brinker, CDA, demonstrates the proper use of dental materials during a course titled "The Art of Exquisite Anterior and Posterior Provisionals," held Friday morning. (Photo/Fred Michmershuizen, *today* Staff)

Super-Snap X-TREME™ FINISHING & POLISHING

3D semispherical coating (400x 200µm)

Advanced 3D Technology

Super-Snap X-Treme, the latest generation in X-Treme polishing, is designed to x-ceed the aesthetic x-pectations of patients today. Super-Snap X-Treme aluminum oxide disks offer x-tra thickness for greater flexibility and durability, and an advanced 3D semispherical surface coating to provide X-Treme gloss results. Super-Snap X-Treme—taking polishing to the next level!

NEW!

medical-grade silicone, and it comes in five colors – amber orange, amethyst purple, diamond white, ruby pink and sapphire blue – for easy coding and identification. It does not require plugs or extra parts to securely hold instruments.

Aqua Theater Aquarium Designs (booth No. 1451), a new exhibitor here at Yankee, is showcasing its selection of aquariums enhanced with digital graphics. "We design, install and maintain custom aquariums that house a TV as a background," says Eddie Hanson of Aqua Theater. You can pick a nautical coral reef scene or a tropical beach sunset – or use some of your dental practice's graphics. "The idea is to use videos and graphics to create a theme," Hanson says.

Eddie Hanson of Aqua Theatre Aquarium Designs (booth No. 1451) shows off a saltwater tank with a dental theme.

"You'll never be bored with your fish tank again."

Meeting attendees also have the chance to meet some of Boston's most highly acclaimed figures in professional sports here at Yankee. Football's Matt Light of the New England

Patriots and baseball's Kevin Youkilis of the Boston Red Sox are appearing from 11:30 a.m. to 2:30 p.m. today at the Top Quality Manufacturing/Glove World booth (No. 1236). Stop by to see them – and even get a selfie with them!

Pacific Dental Conference

Time to change your implant treatment

■ OCO Biomedical, a leader in dental technology, training and instrumentation, will feature “Time to Change the Way You Provide Implant Treatment” as a special presentation today.

Presented by Dr. Charles Schlesinger, OCO Biomedical’s chief operating officer and director of clinical affairs, this session will be an interactive lecture and live dentistry workshop. The AGD-Pace accredited workshop will be held from 10 a.m. to noon in Exhibit Hall M.

During his lecture, Schlesinger will explore the need for implants in today’s practice. Attendees will learn about immediate load technology and how this addresses the needs of today’s dental patients.

Once immediate loading protocols are explained and sample cases shown, Schlesinger will perform a live surgical demonstration, which will build on the foundation presented in his lecture. During the live surgery, he will incorporate OCO Biomedical’s proprietary Guided Surgery System.

According to the company, workshop learning objectives are:

- Understand the need for implants and what your patients are asking for

• **Charles Schlesinger, DDS, FICOL.**
(Photo/Provided by OCO Biomedical)

- Learn what immediate load means and how to accomplish it
- Discuss the physics of immediate loading
- Become familiar with protocols for immediate loading

Attendees will receive two C.E. hours by participating in this no-charge event.

Apart from the workshop, OCO Biomedical will also be showing a range of information and products at its booth, No. 729. Attendees will have an opportunity to take a first-hand

Here at Yankee

Dr. Charles Schlesinger, OCO Biomedical’s chief operating officer and director of clinical affairs, will present “Time to Change the Way You Provide Implant Treatment” from 10 a.m. to noon in Exhibit Hall M today. You can learn more about OCO products at the booth, No. 729.

look at OCO’s Guided Surgery Kit and System. In addition, they will be introduced to the new 2016 OCO Regenerative Products Catalog, the 2016 OCO Nationwide Course Schedule and provided registration information for the upcoming OCO 2016 International Dental Implant Symposium, to be held July 22-23, at the Sandia Resort and Casino, in Albuquerque, N.M.

The company’s technical representative will be on hand to answer questions and discuss the benefits of doing business with OCO. Special Yankee attendee discounts for products will be extended.

States Schlesinger: “Last year at Yankee, our two live-surgery events exceeded our expectations. This year marks the 40th anniversary of OCO

Biomedical. We are proud of the many unparalleled achievements and industry-recognized accomplishments made by our company since 1976.

“During the last year, one of the most exciting developments for us has been the successful launch of our exclusive Guided Surgery Kit and System. The system was integrated in the live surgery performed at the Greater New York Dental Meeting in November in front of a capacity crowd. The immediate feedback there was extremely positive.”

Schlesinger continued: “Furthermore, and most encouraging, we are learning from survey information gained through our nationwide courses, trade show participation and one-on-one interaction with our doctors, that both novice and experienced practitioners are incorporating our system into their practices at record rates.

“Applying this technology has resulted in measurable success, improving patient care while enhancing practice performance. The OCO Guided Surgical System also has been implemented into the majority of today’s CBCT and guide libraries.”

Premium Products - Outstanding Value

One kit for your polishing and glossing needs

By Shofu Dental Staff

■ Super-Snap X-Treme Ultra-Gloss Performance Kit is an award-winning finishing and polishing solution from Shofu Dental Corporation.

Composed of Super-Snap black and violet contouring and finishing disks, Super-Snap X-Treme green and red polishing disks, and complemented by Super-Snap Buff super-polishing disks, DirectDia diamond polishing paste and Beautifil Flow Plus bioactive resin composite, this four-step, color-coded disk system is designed for easy, fast and safe contouring, finishing, polishing and super-polishing of composites, according to the company.

Specifically, it provides an excellent choice for the Class V restorations where esthetics are a crucial component of a successful treatment, Shofu asserts.

The grit of each abrasive disk contains either silicone carbide (black and violet Super-Snap disks) or aluminum oxide (green and red Super-Snap X-Treme disks) and is manufactured without a metal hub, eliminating scuffing and gauging of a composite material.

The disks comfortably fit into an included contra-angle mandrel, creating a stable tool for finishing and polishing work.

Each of the four color-coded ultra-flexible abrasives corresponds to a step in the finishing and polishing process: black (contouring), violet (finishing), green (polishing) and red (super-polishing). To achieve a wet, glossy look, Shofu recommends following the four-step procedure, starting with the black disks, then moving to the violet and green disks and concluding with the red disks.

According to the company, the double-sided Super-Snap X-Treme disks, engineered with a 3-D abrasive technology, demonstrate an optimal combination of thickness, flexibility and durability. They smoothly penetrate interproximal areas and adapt to the curvature of the tooth surface, to meet and exceed varied clinical preferences.

All Super-Snap disks come in refills of assorted grits and sizes, 8 mm and 12 mm. To achieve the finest results, the disks should be used with light pressure, with or without water, in a slow-speed handpiece at a speed between 10,000 rpm and 12,000 rpm.

(Photo/Provided by Shofu Dental)

Here at Yankee

To learn more about Shofu's Super-Snap X-Treme Finishing & Polishing Ultra-Gloss Performance Kit, stop by the booth, No. 1229.

Complementary to Super-Snap and Super-Snap X-Treme disks are Super-Snap Buff, ultra-soft, velvet-like, super-polishing disks; DirectDia, a 20-percent, super-fine diamond polishing paste available in lime flavor; and Beautifil Flow Plus, a bioactive resin composite incorporating Shofu's proprietary giomer technology. Shofu asserts this inclusive biomimetic filler possesses excellent physical properties and capabilities to sustain release and recharge fluo-

ride, neutralize acids and inhibit plaque build-up.

Shofu's Super-Snap X-Treme Finishing & Polishing Ultra-Gloss Performance Kit is an all-inclusive composite finishing and polishing system. According to the company, it is simple and smart, and it delivers superior polish and high gloss each time, providing clinicians with highly efficient and predictable results and facilitating a better patient experience at a lower cost to the clinician.
