For dental professionals of every stripe, 102nd Hinman meeting offers a world of opportunity

By Fred Michmershuizen, *today* Staff

■ It's the 102nd Thomas P. Hinman Dental Meeting, and the Georgia World Congress Center and Omni Hotel at CNN Center are alive with opportunity for dental professionals. The theme of this year's event is "Aiming for Excellence."

"Hinman offers the highest caliber of continuing education and world-class exhibits to help everyone in attendance achieve excellence in their careers and practices," said Dr. Brian Carpenter, general chairman of the 2014 Hinman Dental Meeting.

"We have assembled an impressive roster of speakers and special courses designed to elevate learning for our

An opportunity to learn

By Fred Michmershuizen, *today* Staff

■ Organizers of the 102nd Thomas P. Hinman Dental Meeting have brought in more than 65 leading dental authorities to Atlanta this week to present more than 230 courses, including all-day educational tracks for dentists, dental hygienists, assistants and office staff.

Course topics range from Botox and dermal fillers to myofascial pain

treatment and interactive CEREC instruction. This year, unique course pairings that combine speakers who address both diagnosis and therapeutics for select topics are being offered.

Four new educational tracks are being offered: "Hygiene, Health & Happiness," "Achieving Excellence in Assisting," "Business Office Bullseye" and "Health and Wellness."

more than 22,000 dentists and dental professionals who attend our annual meeting.”

On the exhibit hall floor, nearly 400 companies are on hand to demonstrate the latest in dentistry. Exhibitors are showcasing new technology, equipment, products and services for the entire dental staff.

Convergent Dental (booth No. 239), developer of Solea, is exhibiting for the first time at the Hinman meeting this year.

According to the company, Solea is the first computer-aided preparation (CAP) laser system in dentistry and the first dental laser using the unique wavelength of 9.3 μm , which allows Solea to operate on any tissue and with more precision and speed than

Meeting attendees who step outside the Georgia World Congress Center and Omni Hotel at CNN Center are greeted by pleasant weather Thursday morning.

any other hard tissue laser available on the market.

“Solea’s laser enables dentists to start and nearly finish without touch-

ing the drill for a majority of dental procedures,” the company said. “Dentists have been reporting that 95 percent of patients don’t feel any pain. Of that group, 50 percent feel nothing; 45 percent feel cold or some pressure; and 5 percent say they feel some pain.”

Ellman International (booth No. 1515) is demonstrating its Surgitron line of advanced radiofrequency (RF) generators.

Operating at a frequency of 4.0 MHz, the Surgitron is designed to provide surgical precision and controlled hemostasis for a variety of general dentistry procedures, including gingivectomies, frenectomies, crown and bridge preparations, pulpotomies, incision and drainage, and coagulation, according to the company.

LVI Core I three-day course designed for doctors and their teams to learn together

By Mark Duncan, DDS, FAGD, LVIF, DICOI, FICCMO, Clinical Director, LVI

■ Welcome to the Thomas P. Hinman Dental Meeting, and congratulations on actively moving your understanding and professional success forward!

It is only through excellent education that we individually grow and develop as dental health professionals and, through that, build a practice that is not just successful but delivers comprehensive and high-quality care.

As a patient, I expect the best care I can find. As a doctor, I want to deliver the best care possible. That takes us to the power of continuing education, and, as doctors, we are faced with many choices in continuing education.

As a way to introduce you to the Las Vegas Institute for Advanced Dental Studies, or LVI, I want to outline what LVI is about and what void it fills in your practice. The alumni who have completed programs at

For more information

For more information on the Las Vegas Institute for Advanced Dental Studies, visit www.lviglobal.com.

LVI were given an independent survey, and unlike the typical surveys, 99.7 percent said they love practicing dentistry, and of those surveyed, 92 percent enjoy their profession more since they started their training at LVI. That alone is reason enough to go to LVI and find out more.

While the programs at LVI cover the full breadth of dentistry, the most powerful and life-changing program is generally reported as being Core I, or "Advanced Functional Dentistry – The Power of Physiologic Based Occlusion." This program is a three-day course that is designed for doctors and their teams to learn together about the power of getting their patients' physiology on their side.

In this program, doctors can learn

• The Las Vegas Institute for Advanced Dental Studies. (Photo/Provided by LVI)

how to start the process of taking control of their practice and start to enjoy the full benefits of owning a practice and providing high-quality dentistry. Regardless of whether it is a solo practice or a group setting, every doctor can start the process of creating comprehensive care experiences for his or her patients.

We will discuss why some cases doctors are asked to do are actually dangerous ones to restore cosmetically. We will discover the developmental science behind how unattractive smiles evolve and what cases may need the help of auxiliary health-care professionals to get the patient feeling better.

The impact of musculoskeletal signs and symptoms will be explored, and we will look at how the supporting soft tissue is the most important diagnostic tool you have – not simply the gingiva but the entire soft-tissue support of the structures, in the mouth and also in the rest of the body.

A successful restorative practice should not be built on insurance reimbursement schedules. An independent business should stand not on the whims and distractions of a fee schedule but rather on the ideal benefits of comprehensive care balanced by the patients' needs and desires.

Dentistry can be a challenging and thankless business, but it doesn't have to be. Through complete and comprehensive diagnosis, there is an amazing world of thank yous and hugs and tears that our patients bring to us when we change their lives. The Core I program at LVI is the first step on that journey. That's why when you call, we answer the phone: "LVI, where lives are changing daily!"

THE NASH INSTITUTE

Lecture hall with thirty-plus hands on work stations and ample space for larger groups in lecture format.

Dr. Ross Nash

Total Esthetics Continuum

This learning series is one of the most comprehensive and affordable programs for esthetic dentistry in the world.

The Total Esthetics Continuum includes three 2 day hands on courses:

1. **Direct Composite Resin Dentistry**
May 16 (Fri) - 17 (Sat)
2. **Indirect Esthetic Dentistry**
June 27 (Fri) - 28 (Sat)
3. **Full Mouth Esthetic Reconstruction**
July 25 (Fri) - 26 (Sat)

Each is a course in itself, but together they form a complete study in esthetic and cosmetic dental treatment. By combining good business practices as taught by Debra Engelhardt Nash in the Business School for Esthetic Dentistry with the expertise gained by taking the clinical courses, improved practice success is virtually guaranteed.

Tuition: Individual clinical courses are \$1195 and the full Continuum is \$2995.

Seats are limited.
