On the cutting edge

Attendees at the 149th Midwinter Meeting have the opportunity to expand horizons with the latest advancements

By **Fred Michmershuizen**, **today** Staff

■ It's the Chicago Dental Society's 149th Midwinter Meeting, and more than 30,000 dental professionals have gathered here at McCormick Place in Chicago to see firsthand the latest and most innovative advancements.

"This meeting's intent is to provide every member of the dental team an opportunity to expand their knowledge of the art, science and practice of dentistry through groundbreaking technologies, hands-on courses and in-depth educational programs," said Dr. Richard S. Holba, president of CDS.

On the exhibit hall floor, there's plenty to take in.

KaVo Kerr Group — a global portfolio of dental brands — is featuring 20 new products here in Chicago.

Among them are the new Elements-Free cordless obturation unit and TF Adaptive NiTi file system, available from Axis | SybronEndo (booth No. 1111); new Custom Direct Abutments and InterActive implant systems, available from Implant Direct (booth No. 1111); the new Op300 Maxio digital panoramic imaging system, featuring a new medium field-of-view,

Making things happen from up in the cloud

By Fred Michmershuizen, *today* Staff

■ The folks from web-based dental software provider Curve Dental held a breakfast Friday morning for its VIP customers, admirers and members of the press.

Fittingly, the event was held up on the 29th floor — so attendees could literally look down on the Chicago skyline from up in the cloud.

Those in attendance said they like Curve's cloud-based practice management software because of the freedom and versatility it offers, a point underscored by the always affable Andy Jensen, chief marketing officer of Curve, who mentioned the recent weather emergency that crippled Atlanta.

"That's an unexpected reduction in production, and the only way you can get that production back is get on the phone as quickly as possible and reschedule all those patients who couldn't come to the practice," Jensen said. "If your practice is on the cloud, you can start making those phone calls from home, or even your office manager can pick it

From left: Genevieve Poppe, Debra Engelhardt-Nash, Terri Benish, RDH, and Andy Jensen at Curve Dental's breakfast Friday morning. Poppe and Benish run a five-office practice in Wisconsin using Curve Dental's cloud-based dental software. (Photo/Fred Michmershuizen, *today* Staff)

up and start making calls from home, and have all those appointments rescheduled before the day is even over with."

It's just one of the many advantages to being on

the cloud, Jensen said.

To learn more, visit www.curvedental.com — or simply look for the folks in the orange shirts at booth No. 4801 here at the Midwinter Meeting.

MOSAIC *“from page 1*

Company, housed in a former power plant/warehouse that dates to the early 1900s — just blocks away from McCormick Place and the Chicago Midwinter Meeting.

It was a suiting venue for the evening's theme: the critical role that innovative products play in dentistry — and patient care.

The evening's host, Dr. Lou Shuman, president of The Pride Institute, said: “Sure, we fix cavities and straighten teeth. Sure, we give people better-looking smiles. ... But we're really in the business of providing great care and improving the quality of life of the people we serve. And everyone here is part of this fabric — this mosaic of dentistry.”

With that, the event took on the aura of an upscale fashion show, with top executives and brand managers coming out one at a time as if on a runway — with music and lights completing the mood.

And just like a fashion show, each of the 20 products they represented was briefly described.

Next, attendees were presented with another surprise, when the venue seemed to transform again, this time turning into a private exhibit hall, with each of the products represented. Attendees were invited to participate in hands-on demonstrations

• **Guests enjoy a cocktail reception sponsored by KaVo Kerr Group on Friday evening.**

and meet directly with the leadership teams behind each of the products.

The variety of products and brands on display clearly demonstrated the breadth of KaVo Kerr Group's portfolio of dental brands and operating companies. Those brands include KaVo, Kerr, Kerr Total Care, Pen-tron, Axis | SybronEndo, Orasoptic, Pelton & Crane, Marus, DCI Equipment, Gendex, DEXIS, Instrumentarium, SOREDEX, i-CAT, NOMAD, Implant Direct andOrmco.

Among the 20 products introduced: MASTERtorque M8900L handpieces from KaVo; the Demi Ultra Curing Light and an enhanced SonicFill from Kerr; the CariVu caries detection device from DEXIS; the i-CAT FLX MV CBCT from i-CAT; the ElementsFree cord-free obturation unit from Axis | SybronEndo; the Op300 Maxio digital panoramic imaging system from Instrumentarium; the Pro II handheld

Colgate touts findings of independent review

Cochrane Review confirms clinical benefits of triclosan/copolymer formula in Colgate Total

By Sierra Rendon, *today* staff

■ A trio of Colgate executives gathered here in Chicago Friday morning to announce the positive findings of an independent review on the triclosan/copolymer formula in Colgate Total[®] toothpaste.

"I am pleased to confirm that one of our most noteworthy contributions to helping to combat (periodontitis) is our introduction of the triclosan/copolymer system to fluoride toothpaste, which is found in our line of Colgate Total toothpastes," said Dr. Fotinos S. Panagakos, global director, scientific affairs and research relations for the Colgate-Palmolive Company.

Panagakos, along with Gavin du Toit, marketing director for Colgate Oral Pharmaceuticals, and Robert A. Faiella, DMD, immediate past president of the American Dental Association, were on hand to answer questions about the

• A stream of attendees waits in line to learn more about Colgate Total and all its benefits at the Colgate booth, No. 1818. (Photo/Sierra Rendon, *today* Staff)

Colgate Total formula and the independent review.

The review was conducted by the Cochrane Oral Health Group, which carries out systematic reviews of primary research in human health care and health policy that are internationally recognized as the highest standard in evidence-based health care.

Entitled "Triclosan/copolymer-containing toothpastes for oral health," the Cochrane Review evaluated the effects of triclosan/copolymer-containing fluoride toothpastes, as compared with traditional fluoride toothpastes, for the long-term control of caries, plaque and

Here in Chicago

For more information about all Colgate Total products, stop by the booth, No. 1818, or visit www.colgateprofessional.com.

gingivitis in both children and adults.

The Cochrane Review evaluated 30 studies dating from 1990 to 2012 in which 14,835 participants were randomized to receive either a triclosan/copolymer-containing fluoride toothpaste or a traditional fluoride toothpaste that did not contain triclosan/copolymer.

The toothpaste used in the studies containing the triclosan/copolymer system and fluoride was Colgate Total.

The resulting data highlighted the many clinical benefits of using a triclosan/copolymer-containing fluoride toothpaste and concluded there was no evidence of harmful effects associated with the use of triclosan/copolymer toothpastes.

Some key findings of the Cochrane Review include:

- After six or more months of use, fluoride toothpaste containing triclosan/copolymer provided a 22 percent reduction in plaque as compared with traditional fluoride toothpaste. It also provided a 41 percent reduction in plaque severity as compared with traditional fluoride toothpaste.

- After six or more months of use, fluoride toothpaste containing triclosan/copolymer provided a 22 percent reduction in gingivitis compared with traditional fluoride toothpaste. It provided a 48 percent reduction in gum bleeding compared with traditional fluoride toothpaste.

"I commend the Cochrane Oral Health Group for taking the time to conduct a rigorous review of the clinical studies performed on the fluoride toothpaste containing triclosan/copolymer," Panagakos said. "I have no doubt that this noteworthy review will draw further attention to the topic of gum disease, which is a prevalent oral health issue..."

Now one size fits all!

NEW SNUGGIES[™]

The only sensor sleeve that custom-fits your sensor!

Protect your equipment and your patients with a snug, custom-fit sensor sleeve—regardless of sensor size. **Simply peel, stick, and go!**

Snuggies work with sensors of any size, shape, and thickness. Patients love Snuggies because there's less loose plastic to gag on. Practitioners love Snuggies because one-size-fits-all, eliminating the need to buy and stock many sizes. Plus, with Snuggies, you don't have to twist the sleeve around delicate sensor cords to keep the sensor from sliding around.

Snuggies are economically priced in boxes of 500. Order today and see for yourself! Call your dental dealer or Flow Dental.

Ensuring a **dry** working environment every time.

Now available:

NEW VALUE PACK 25 SYRINGES • 55 APPLICATOR TIPS

Now with Parkell's new Dryz™ Value Pack (\$182) you'll order less often and **SAVE ALMOST A DOLLAR PER SYRINGE!** So if you frequently use our gingival hemostatic paste for your retraction needs, order your value pack today!

Dryz™ Hemostatic Retraction Paste:

- Stops gingival bleeding and seepage that may interfere with impression taking.
- Fast-acting.
- Great for tissue management when seating restorations, placing rubber dam clamps (controlling bleeding), bleaching teeth (to manage moisture) and restoring subgingival cavities.
- Light green color makes the material easy to detect.
- Fraction of the cost of other retraction materials.

» Visit us at booth #4200 to learn more!

(Clinical photos courtesy of Dr. Harry Long, Wayne, NJ.)

Fig. 1
Introduce Dryz™ into the gingival sulcus, making sure to fully contact all of the soft tissue of the gingival sulcus.

Fig. 2
Rinse the Dryz out of the dental sulcus using copious amounts of water.

Fig. 3
The clean and retracted gingival sulcus, exposing the complete finished margin of the prepared tooth.

Dryz™ is terrific to use alone or in conjunction with retraction cord or compression caps. Dryz stops bleeding and seepage from gingival crevicular fluid that may interfere with impression taking. It's fast-acting and just a fraction of the cost of all other retraction materials on the market!

The light green color of Dryz contrasts nicely with gingiva, blood and tooth structure, making it easy to detect where the material has been placed. Dryz is also easily removed with an air/water syringe and leaves no residue to interfere with impressions or seating of restorations.

Using Dryz is a breeze! Prior to taking your impression, rinse and dry the prep. Isolate the area and simply apply Dryz into the sulcus directly from the self-dispensing syringe without the need for a separate dispensing gun. Dryz will create a nice space between the gingival tissue and tooth surfaces while controlling any bleeding with its aluminum chloride.

If you prefer, you may also use compression caps for a little more "push" into the sulcus. Then, just let the material sit for a few minutes (depending on the amount of hemostasis that's necessary), rinse thoroughly, dry and make your impression!

Dryz is also great for tissue management when you're seating restorations, placing rubber dam clamps, bleaching teeth and restoring subgingival cavities. It controls seepage that may contaminate a sensitive, restorative material, allowing you to do optimal restorative dentistry.

Dryz is also available in the Standard Kit (\$180) which includes 7 syringes and 15 applicator tips.

Order direct from Parkell for a 45-Day Risk-Free Trial!*
