Products unveiled

By Sierra Rendon, Dental Tribune

If you're looking for ways to be more efficient and effective in your dental practice, the Chicago Midwinter Exhibit Hall is a great place to suss out the best ways to do it.

Hundreds of businesses bring their newest and most innovative technologies to this show to introduce them to the industry. As you walk through the aisles of the Exhibit Hall, here is just a sampling of the new products you can find.

- **Tooth Tunes:** Make brushing fun for your kids — or maybe even yourself — with these innovative toothbrushes that play chart-topping music for two minutes.

The patented technology delivers high-quality sound by broadcasting music into the jaw, which is then transmitted through the inner ear, allowing the per-

Dentistry goes live in the Exhibit Hall

By Sierra Rendon, Dental Tribune

If you came to learn, the Chicago Midwinter is sure to have a forum you'll appreciate. A variety of free educational opportunities abound, from lectures to workshops to live dentistry.

For instance, on Thursday, Dr. Frank Milner spoke in a live dentistry lecture on "Combining Esthetic Principles When Restoring Complex Anterior Restorations" on the Exhibit Hall floor (at the end of the 200 aisle).

The live patient demonstration involved creating a composite veneer diastema closure, and attendees could re-

ceive up to 3 C.E. hours for attending.

Today, in the same location, you can attend a live patient demonstration with Drs. Ahmad Eslami and James Stein on "What's the Latest in Implant Technology" from 9:30 a.m. to 12:30 p.m.

The session will feature the latest technology for implant diagnosis and treatment planning, bringing together CBCT guided implant surgery as well as the integration of CAD/CAM restorative techniques.

The session is free and can earn you three C.E. hours.

Check out the official program of the Chicago Midwinter to determine all of your educational options.

Dr. Frank Milner speaks Thursday morning as he performs a live patient demonstration during his session on 'Combining Esthetic Principles When Restoring Complex Anterior Restorations.'

Curve moves into smartphone arena

By Fred Michmershuizen
Dental Tribune

If you are going to spend a busy day at the Chicago Midwinter, it is a good idea to start the day off with a proper breakfast. That means eggs, of course.

There were plenty of eggs to be had Thursday morning when Curve Dental, one of the industry's most innovative practice management software providers, kicked off this year's annual meeting with an appreciation breakfast for its customers.

It was a great opportunity for those who use Curve's web-based practice management system to get a look at some convenient new features.

Andy Jensen, left, shows off Curve Dental's new smartphone features to Dr. Darryl Stich, a Curve customer. Photo/Fred Michmershuizen, Dental Tribune

"We recently launched ourselves into the mobility/smartphone arena," Andy

Here in Chicago

For more information, stop by the Curve Dental booth, No. 4801.

Jensen, the marketing guru at Curve Dental, told Dental Tribune. "Now our customers can access their patients' information and their practice schedule using a smartphone, either Apple or Android."

Curve also has something new for patients whose dentists are Curve customers: They can now complete forms using an iPad or other type of Android tablet.

Jensen pointed out that these new features are not an app. Rather, they are features that are built right in to the interface. He said even more new features are in the works.

PhotoMed gives you options

Configure your Canon camera with the flash that is right for you

The macro flash that you use for dental photography has a huge impact on the quality of your images. Not all macro flashes are up to the task and many that are being offered are not compatible with the cameras they are being sold with.

When it comes to outfitting a Canon digital camera with a macro flash, the best choices come from Canon, Metz and Sigma. Real flashes from real flash manufacturers - not "frankenflashes" that look like they were assembled in someone's garage.

When you call the experts at PhotoMed, they can help guide you to the right flash for your system. Need a complete camera that includes unlimited support? We can help with that too.

Call us and find out why we're known for the best camera equipment and the best support available.

LVI, DTSC join forces

Physical and virtual campuses intersect at LVIGlobalOnline.com

**By Christiane Ferret, C.E. Director
Dental Tribune Study Club**

Distance learning, virtual networking and the practice of dentistry seem made for one another. And while nothing can replace the value of learning through hands-on experience with patients, the reality is advancements in dentistry come at us far too rapidly for any individual to keep pace via only onsite opportunities.

In recognition of the convergence of the physical and virtual worlds in post-graduate dental education, the Las Vegas Institute for Advanced Dental Studies (LVI) and the Dental Tribune Study Club (DTSC) have pooled resources and expertise to create the online educational platform, www.LVIGlobalOnline.com.

This virtual campus electronically expands the footprints of the LVI campuses in Las Vegas and Brisbane, Australia, to make LVI's ever-expanding body of knowledge more widely available to dental teams worldwide. The online educational community complements what is already one of most comprehensive live-patient, post-graduate education programs in dentistry.

With its February launch, www.LVIGlobalOnline.com establishes itself as a critical resource for dental professionals who want to keep their teams in demand in their local markets. A broad mix of courses cover the full spectrum of dental sectors. Some courses are scheduled to stream live with an interactive component connecting students and instructors; other courses are available on demand with opportunity to engage the instructor through an "Ask The Expert" feature in a social-media-type framework. Some courses are offered at no charge; others have a nominal fee.

Courses qualify for ADA/CERP-recognized continuing education credit to help meet annual C.E. requirements. A link to a C.E. quiz is available to registrants to engage after completing the class at their own pace, on their own schedule. But far more important than the C.E. credit is the real-world positive impact the courses are designed to have on a dental practice's success.

The LVI Global Online campus enables dental professionals throughout the world to access educational resources such as live and interactive webinars, on-demand courses, clinical articles and videos, roundtable discussions and video blogs — as well as educational and informative writings and commentary from an array of dentistry specialists and thought leaders.

LVI Global Online will continually add new e-learning modules and associated content. Reflecting a core tenet of the LVI educational philosophy, the site's focus isn't restricted to only dentists. The curriculum delivers high-value content to every member of the dental team.

The LVI Global Online campus is open

Check it out

Explore the latest hub in the expanding world of dental education and community at www.LVIGlobalOnline.com.

to professionals representing every dental sector, including general dentistry, endodontics, periodontics, cosmetics, laser, hygiene and practice management.

"By bringing these resources to the Web, LVI Global Online makes it easier

than ever for dental professionals worldwide to experience LVI's advanced training and techniques," said LVI Global CEO and Founder Bill Dickerson.

The site also advances the mission of DTSC to deliver educational opportunities to dental professionals throughout the world, while honoring the study-club tradition of an open, friendly sharing of fresh perspectives.

With more than 32,000 members worldwide, DTSC, based at www.dtstudyclub.com

and onsite at major dental meetings and trade shows, is arguably the fastest-growing education platform in dentistry. Its success is grounded in a commitment to providing dental professionals with a borderless community that inspires new possibilities and creates higher expectations. DTSC delivers the best and latest in dentistry higher education, technology, product knowledge and peer insights directly to dental professionals' homes and offices.
