# Going for the gold

By Fred Michmershuizen, *today* Staff

■ Every year in late March, it's time to gather in Atlanta for the Thomas P. Hinman Meeting. Time to put your thinking cap on and take advantage of world-class educational and networking opportunities. Time to catch up with your compatriots and make lasting new contacts. Time to enjoy a wide range of special events.

The theme of this year's event, the 103rd, is "Foundation for the Future," and meeting organizers have laid out plenty of offerings to keep you busy this week.

"Hinman offers the very best in continuing education and world-class exhibits that help build a foundation for the future for everyone in attendance," said Dr. Dave Lee, general chairman of the 2015 Hinman Dental

## Expand your knowledge

By Fred Michmershuizen, *today* Staff

■ More than 230 courses are being offered here at the 103rd Thomas P. Hinman Meeting in Atlanta.

Some of the educational highlights from Thursday included "Botulinum Toxin for Best Therapeutic and Esthetic Outcomes," presented by Dr. Louis Malcmacher; "Building a Better Business Office," presented by Kirk Behrendt, Dr. Gary Dougan and Chuck Blakeman; and "Social Media Foundations," presented by Tonya Lanthier, Laci Phillips and Denise Ciardello.

Educational highlights today include "Hygiene from the Ground Up," presented by Karen Davis, Dr. Samuel Low and Dr. David Wong, from 9:30 a.m. to 12:30 p.m. Saturday, highlights include "Laboratory Technicians Leading the Way to Excellence," presented by Dr. Javier Vasquez, Skip Carpenter, Von Grow and Bill Marias, from 8:30 a.m. to 4 p.m. (check your show guide for room numbers).

On the exhibit hall floor, many companies are offering presentations in their booths. Table clinics are also being presented on the exhibit hall floor.

**GOLD** *from page 1*

Meeting, in a press release announcing the opening of the meeting. “We have assembled truly the best in the profession, more speakers than ever before, as well as special programs and courses designed to elevate learning for our more than 21,000 dentists and dental professionals who attend our annual meeting.”

In the exhibit hall at the Georgia World Congress Center, more than 430 companies are on hand, showcasing the latest technology, equipment, products and services that the dental industry has to offer.

**New this year: G.O.L.D. Program**

New at Hinman this year is the G.O.L.D. (Graduates of the Last Decade) Program, taking place today.

Attendees come and go Thursday morning at the Georgia World Congress Center, home to the Hinman meeting.

Designed specifically for those who graduated from dental school less than 10 years ago, the G.O.L.D. Program is a full day of courses designed to get dentists on the path to successful practice ownership.

“Today, graduating dentists face extraordinary challenges with eco-

nomie pressures, considerable student debt, increased competition and the lure of corporate dentistry,” Lee said. The all-day program, being held in Room A-411, features eight lectures on topics that will “help new dentists navigate these challenges and prepare them to run a successful dental practice,” Lee said.

Highlights of the program include “Dental Team Building,” presented by Dr. Mark Hyman; “How to Own Your Practice,” presented by John McGill; “Why Patients Say Yes to Team Dentistry,” presented by Dr. Lee Ann Brady; and “The Secrets to Thriving in Practice Right Out of the Gate,” presented by Kirk Behrendt (check your show guide for exact times).

A beer and wine reception will be held at the conclusion of today’s G.O.L.D. presentations.

# A BruxZir solid zirconia veneer case in conjunction with an anterior crown

By Michael C. DiTolla, DDS, FAGD

■ Glidewell Laboratories' weekly web series "Chairside Live" has given us a great opportunity to communicate with clinicians across the nation and educate them on topics that they're actually interested in learning. If you haven't yet had the opportunity, episodes can be viewed on-demand at [www.chair sidelive.com](http://www.chair sidelive.com) or on YouTube and iTunes.

In the Case of the Week from Episode 105, I wanted to try something that I really hadn't done before. I've done some anterior BruxZir® restorations, and they turned out well, but I had yet to do an anterior crown case in conjunction with a BruxZir veneer. This is going to be a straightforward case on teeth #8 and #9 with a BruxZir crown and a BruxZir veneer adjacent to it.

## Case presentation

This patient had a pre-existing PFM on tooth #8 that was a poor esthetic

match (Fig. 1). Because of the patient's deep overbite, I liked the idea of using a BruxZir crown for tooth #8 because I could keep it almost as thin as that PFM was on the lingual. I also planned to have the lab fabricate a BruxZir no-prep veneer for tooth #9, which happened to be facially deficient anyway.

I anesthetized the patient and took off the crown. The prep had been endodontically treated, and it looked like a gold post was placed in the incisal edge.

We placed the first cord (size 00) and then prepared the gingival third of the tooth. Because the tooth already had a PFM, I didn't have to do a ton of reduction; it was more about where I did the reduction.

While reducing, I exposed a little bit of gold, so I covered it up with a self-adhering composite resin, and then I finished smoothing off the prep (Fig. 2). Then I placed the top cord (size 2), which upon removal left us a wide open sulcus that would be sim-

## Here in Atlanta

Learn more about BruxZir restorations at the Glidewell booth, No. 1345.

ple to impress. That's the benefit of using the two-cord technique.

Six days later, we took off the temporary and tried in the final restorations, which the patient approved. We cemented the crown with Ceramir® Crown & Bridge cement (Doxa Dental; Newport Beach, Calif.).

The thing I love about Ceramir cement is the fact that it bonds on its own to zirconia without requiring you to decontaminate the internal surface of the BruxZir crown or use a zirconia primer. Plus, the cement will typically clean up in just one piece (Fig. 3).

With the crown placed, I then turned to the veneer. After try-in, I decontaminated the internal portion of the BruxZir veneer by sandblasting

it for 15 seconds. I then placed a layer of Z-Prime Plus and air thinned it, and then placed a layer of bonding agent and air thinned it.

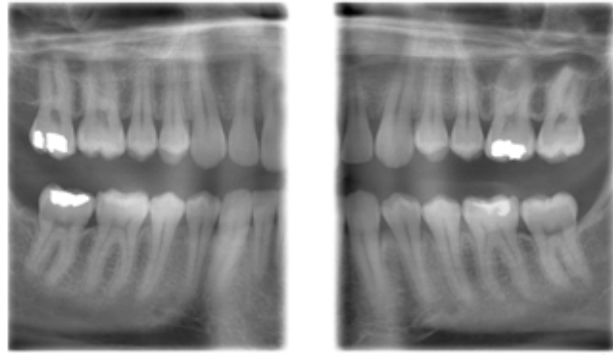

I isolated the two adjacent teeth with mylar strips and then etched with phosphoric acid, rinsed, placed the bonding agent, air thinned it, placed the veneer with the light-cured resin cement inside and cured it. You can definitely light-cure through solid zirconia. Try it yourself when you receive the case.

Here's the patient with the crown and veneer in place (Fig. 4). It looks pretty good, considering those are BruxZir solid zirconia restorations with no ceramic on the facial. BruxZir continues to look better because of the increased translucency of the material.

I'm now feeling more confident that if I'm placing a crown on a single anterior tooth that I can place a BruxZir veneer on the tooth next to it. As long as #8 and #9 match, we have a chance of having a nice smile.

ProMax S3 Extraoral Bitewing

ProMax S3 anterior PA Image

ProMax S3 Standard Adult Pan - From Same Patient As Bitewing

## ProMax® S3 WHAT IF... You Could Do ALL Your Routine Imaging Extraorally?

- Extraoral bitewings capture a greater number of surfaces for better caries detection versus intraoral modalities\*
- Anatomically Accurate Extraoral Bitewing Program enhances diagnostic capabilities and eliminates gagging
- Patented SCARA technology opens interproximal contacts
- Enhances clinical efficiency - takes less time and effort than a conventional intraoral bitewing
- Captures more clinical data from lateral to third molar
- Fully upgradable to 3D and cephalometric capabilities
- Open design for simple, face-to-face patient positioning

\*According to "Efficacy of ProMax Bitewings vs. Intraoral Bitewings." For a copy of this study, please contact Planmeca USA.
