ACKNOWLEDGMENTS

The Standing Committee on Research and Education (SCORE) gratefully acknowledges the efforts of the designer, the contributing authors and the reviewers of the summary articles in this journal.

We thank Dr. David Starr Alleman (a pioneer in the development of noninvasive dental procedures in the USA) for reviewing the article titled "IDS vs DDS".

IJDS
INTERNATIONAL JOURNAL OF DENTAL STUDENTS

FROM THE EDITOR-IN-CHIEF

HUTHAIFA ABDUL QADER, DDS

| IADS INTERNATIONAL SCIENTIFIC OFFICER 2019/2020

It is with profound pleasure, humility and anticipation that we celebrate the launch of International Journal of Dental Students (IJDS) with this inaugural issue. On behalf of the Standing Committee On Research and Education (SCORE), I would like to extend a very warm welcome to the readership of IJDS. I take this opportunity to thank our designer, editorial team and reviewers, all of whom have volunteered to contribute to the success of the journal.

International Journal of Dental Students (IJDS) is primarily focused on shedding light upon the highest quality current clinical treatments, techniques, clinical cases, and research in dentistry. We endeavor to do this by modernizing up-to-date techniques and controversial topics in clinical application and research accompanied by high-quality comprehensive clinical imagery to enhance students' apperception in a prepossessing pattern not restricted to the old-fashioned monotonous outlook of the original long papers. **The ingenuity of this journal** is showcased by its depiction of how the art and science can work together to produce innovative articulacy.

IJDS is dedicated to pushing on the boundaries of educational opportunities and encouraging students to read outside of their universities' syllabus thus **serving as a student-friendly** and inviting forum for creative exchange of undogmatic knowledge and useful information. The commitment to the dissemination of contemporary techniques and procedures will eventually lead to overriding the slow-witted doctrinaire system taught in most dental schools worldwide. Hence this will inspire the new generation to circumvent this global scheme and will facilitate their embracement of new methodologies based on the foundation of evidence-based protocols combined with sound clinical judgement.

I am strongly convinced that this initiative will provide well-researched articles on promising developments and science-driven tutorials on up-and-coming technological breakthroughs conforming to the editorial standards expected by the scientific community. For the time being, we have managed to get one complete section reviewed and verified by respected dental experts, therefore our priority objective is instituting the formation of an **"Executive Editorial Committee"** that will assist by summarily reviewing all incoming summaries as well as providing continual feedback and collaboration. This committee will consist of outstanding mid-career researchers, each with a reputation for scientific excellence and administrative efficiency. The goal of the committee is to efficiently review the incoming summary articles and give advice on their enumeration and cohesiveness. Such a function is crucial in order to corroborate that all articles are in the correct ballpark of novelty and quality that our journal requires.

IJDS is destined to become the first scopus indexed journal that focuses on **Master's and PhD students' theses and dissertations** thus facilitating publishing any work that receives a high or top priority recommendation. This policy reflects our interest in quickly publishing all manuscripts judged to be the most impactful during the peer review process. In consequence, we will be offering the possibility of publishing our students' manuscripts prior to thesis/dissertation defence or graduation.

IJDS is an official publication of the **International Association of Dental Students (IADS)** which complements and perpetuates the process of education. The learning and exploring of our field has never stopped, thus we will strive to help readers become better researchers and clinicians, so they can advance their excellence in lab research and/or offer their patients the best—and most responsible—treatment possible.

I close this message by inviting everyone to submit their exciting summaries to IJDS. Contributions that can demonstrate near-term practical usefulness and take a multidisciplinary and convergent approach will definitely find a home in IJDS in case they receive a high degree of enthusiasm in the review process. Therefore, we are committed to publishing any work that significantly improves the performance and quality of this journal.

Once again, I welcome you to IJDS. With your support, I see a bright prospect of serving science and the dental student community even better in the future. We can all be proud that our field has active researchers who anonymously provide the most valuable mastery. It speaks volumes to our collegiality and dedication to service.
