ADA continues to monitor proposals for health care reform

By Fred Michmershuizen, Online Editor

As Congress prepared to adjourn for its summer recess, the American Dental Association was taking a wait-and-see approach to pending health care reform legislation.

"The dental provisions they contain can best be described as the good, the bad and the undecipherable," ADA President Dr. John S. Findley told ADA News, the association's official publication. "Our most pressing concern is with the proposal for a government-run insurance plan that would compete with private insurers in the marketplace and private plans offered in the so-called 'exchange.'"

Findley said that a proposal to require dental coverage for children would need clarification before the ADA would support it.

"The whole concept of a public plan remains troubling, and we would oppose any plan that required dentists to participate, directly or indirectly dictated fees for the private market or would lead to a government-run system," he said.

The ADA has continued to make its message clear through dialog with members of Congress and the administration, following the approval of policy by the ADA House of Delegates at the 2008 annual session in San Antonio.

"The ADA does not support a

single-payer system because we believe it would stifle access and innovation and reduce the quality of patient care," said Findley, who pointed out that the association's efforts in the nation's capital are ongoing.

"We are pursuing amendments to improve the dental provisions," he said.

Findley said that flatly opposing the whole thing is not an option.

"If we aren't highly visible in the process, we open the door to other groups who will claim to be the voice of the oral health community and attempt to dictate what kind of dental provisions get included," he said. "As the saying goes, you are either at the table or on the menu."

According to the ADA, the proposed legislation should be rewritten to enhance Medicaid reimbursement. Without it, Findley said, there would be "no significant access improvements for the poor and other vulnerable populations." **DT**

Dr. Fred Pockrass and his wife, Ina, operate the first certified 'green' dental practice and are also founders of the Eco Dentistry Association.

Eco Dentistry Association announces international launch

New dental association aims to make profession eco-friendly one toothbrush at a time

The Eco Dentistry Association (EDA), an international association of dental professionals, was launched in May by the creators of the country's first green dental office to give colleagues access to eco-friendly practices and consumers the power to encourage their dentists to adopt earth-friendly methods.

- If every U.S. dental office installed a device capturing mercury-containing waste, at least 7,400 pounds of toxic waste would be kept out of the nation's water supplies each year.

- By switching to reusable and non-toxic disinfection methods, the dental industry would prevent 680

million disposable chair barriers, light handle covers and patient bibs, and 1.7 billion instrument sterilization pouches from ending up in landfills yearly.

The Eco Dentistry Association offers dental professionals practical tips on reducing waste and pollution and conserving resources, auxh as using cloth wrappers instead of disposables to sterilize dental instruments, installing energy efficient lighting, properly disposing of mercury-containing dental waste, and incorporating planet-friendly building and office methods, such as non-toxic paint and recycled copy paper. It provides the public with infor-

mation about digital X-ray systems that reduce radiation exposure by up to 90 percent, educates them about keeping dental appliances free from the hormone-disrupting chemical, bisphenol-A, found in many plastics, and gives them questions to ask their dentists about environmental stewardship.

Soon after launch, the new planet-friendly organization had registered eco-conscious members in 20 states and Canada. The group's members hail from all over the country, including places like Waxahachie, Texas; Beachwood, Ohio; and Fort Bragg, N.C.

The organization is the brain-child of Dr. Fred Pockrass, a dentist, and his lawyer-turned-entrepreneur wife, Ina Pockrass. Six years ago, the couple created the model for eco-friendly dentistry, and they operate their own successful dental practice in Berkeley, Calif., the first in the country to be certified as a green business. They formed the organization to stimulate a movement in the dental industry to employ environmentally sound practices.

"Dentistry and dental hygiene have always been in the forefront of preventative care. Now we are in the forefront of planetary care," said Pockrass. "The Eco Dentistry Association gives dental practitioners a single point of contact for resources and research to green their practices, and access to a collaborative community of like-minded professionals."

"While some people still think that doing environmentally responsible business costs more," said Gil Friend, CEO of Natural Logic, a sustainability consulting firm that analyzed costs and benefits for the EDA, "our study busts that myth. Nearly every eco-friendly innovation is also friendly to the bottom line. Even simple things, like making the switch from paper patient charting to digital charting, can yield an immediate payback."

Mojo™ Cement shifts confidence, *NOT SHADE!*

Introducing Mojo™ Veneer Cement – the cement that leaves shade shift behind and helps you create a seamless, natural looking smile. Give your patients back the self-confidence they deserve! Mojo is the ideal cement because of two important features 1) try-in gels that match the polymerized cement and 2) no detectable shade shift.

Experts say "the single most important comparison, and most clinically relevant, is

that between the try-in gels and the cured cement after aging."[†]

Mojo is the ONLY cement where ALL SHADES have been proven to have undetectable shade shift between the try-in gels and the cured cement after aging.^{}** Mojo is available in

4 versatile shades, designed for a simple warming or brightening of the final restoration to ensure a perfect match with surrounding teeth.

Get your confidence boost by calling today or visiting our website to find out more about this new, affordable addition to the Pentron product family.

Align Technology and Ormco end patent dispute, plan to collaborate

Align Technology, manufacturer and marketer of Invisalign, has reached a settlement with Ormco, a subsidiary of Danaher, to end all pending litigation between the parties and to begin a new strategic collaboration.

As part of the settlement, Align will make a cash payment of approximately \$13 million to Ormco and issue approximately 7.6 million shares of Align's common stock to Danaher, that after issuance will be equal to approximately 10 percent ownership interest in Align.

The value of the shares is approximately \$77 million (based on the closing price of Align's common stock on Friday, Aug. 14).

Align and Ormco have also agreed upon an exclusive collaboration over the next seven years to develop and market an orthodontic product that combines the trademarked Invisalign system with Ormco's trademarked Insignia orthodontic brackets and arch wires sys-

tem to treat the most complex cases.

Each party will retain ownership of its pre-existing intellectual property, and each party will be granted intellectual property licenses in their respective field for jointly developed combination products.

"We are pleased to resolve this ongoing litigation with Ormco and to begin a new relationship that meets our shared goals of providing innovative products and excellent service to our orthodontic customers," said Thomas M. Prescott, president and CEO of Align Technology, in a news release.

"This collaboration with Ormco, a fellow innovator in digital orthodontics, gives us the ability to compete for a segment of the market that is difficult to treat with Invisalign alone and accelerates our long-term plan for a combination product."

(Sources: Align Technology and Danaher Corp.)

Local anesthesia is truly effective only when injected

A painful truth in dentistry today is that for most dental procedures, local anesthesia is truly effective only when injected. The problem, of course, is that both the insertion of the needle and the injection of the anesthetic fluid itself can cause discomfort.

Dentists have been using topical anesthesia to reduce the pain involved in needle insertion and fluid injection for decades, and they have tried to use finer-gauge needles in the belief that they cause less pain. However, recent research has shown that needle gauge has no effect on perceived pain level.

Topical anesthesia can be useful for minimizing the pain associated with needle insertion, but it has not been proven to address pain associated with the actual injection of the local anesthetic solution.

A recent study in *Anesthesia Progress* examined the effectiveness of topical anesthesia in reducing pain associated with needle insertion separately from the pain associated with injection of the anesthetic. Results were investigated after different intervals (two, five and 10 minutes) to determine the time for optimal efficacy of the topical anesthetic.

In a double-blind, placebo-controlled study, responses from 85 people showed that the topical anesthetic was statistically and significantly more effective compared to the placebo for reducing the pain caused by needle insertion alone at all time points (two, five and 10).

However, it had no effect on perceived pain intensity associated with injection of the local anesthetic solution at any of the time intervals.

At all time lengths, patients reported the same degree of pain from anesthetic solution injections in topically anesthetized and placebo locations.

Therefore, the minimum two-minute period appears to be sufficient for the topical anesthetic application, as a five- or 10-minute delay has no added benefit in reducing the pain of needle insertion.

To read the entire study, "Effect of Time on Clinical Efficacy of Topical Anesthesia," visit www.allenpress.com/pdf/anpr-56-02-03.pdf. **DT**

Journées Dentaires de Nice shines once again

By David L. Hoexter, DMD, FACD, FICD, Editor in Chief

The Journées Dentaires de Nice dental meeting gathered in Nice, France, in June — as it has for every other year since 1976 — to exchange information on all phases of dentistry, as well as to give exciting up-to-date presentations on futuristic possibilities in our profession.

In June, the sun reflects on the French Riviera like no other place on Earth, making it a perfect location for practitioners to sparkle with the knowledgeable exchange of dental presentations.

Participating supporters from the Chicago Midwinter Dental Meeting and the Greater New York Dental Meeting were there in full force, sharing information with colleagues from France and the rest of the world.

An added glow this year was a warm reception at a beautiful mansion and garden on the sea. There, the mayor of Nice awarded personal citations and medals to a select few who enhanced this wonderful cultural exchange.

Dr. Robert Edwab, executive director of the Greater New York Dental Meeting, was one the recipients. Edwab extended an invitation for all to come, share and participate in the Greater New York Dental Meeting in November, which attracted more than 55,000 attendees from around the world last year.

Since its inception, every Journée Dentaires de Nice has had a special auditorium devoted solely to implants and

(From left) Dr. M. Kaduch, organizer of the Journées Dentaires de Nice; Dr. Robert Edwab, executive director of the Greater New York Dental Meeting (GNYDM); Dr. Cliff Salm, general chairman of the GNYDM; Prof. David Hoexter, editor in chief of Dental Tribune.

implant-related presentations. While many meetings these days have sessions related to implants, this group had the foresight and fortitude to offer them years earlier than any other meeting.

Dr. Gerard Scortecchi is the chairman of the implant section of the Journée Dentaires de Nice, and has been for many years. He has done a formidable job with masterful presentation choices that are devoid of the political or commercial pressures that sometimes surround such organizations.

Scortecchi is a wonderful practitioner, author and modest colleague who endeavors to give a forum to practitioners, as well as implant manufacturers, to elucidate new procedures, products and regenerative materials so that participants can best serve their patients. He is to be congratulated on his achievements and impartiality.

During the Nice meeting, the exhibits were presented in a neat and orderly fashion, making it easy to find the new products as well as making them accessible to all.

Drs. M. Kaduch and M. Burdin have worked exhaustively over the years to cultivate a wonderful meeting with a unique personality that incorporates all of the style and class the French Riviera is known for.

I have attended this congress several times, and I hope this gem of a biennial meeting continues to flourish and sparkle under the French Riviera's sun. **DT**

About the author

David L. Hoexter is director of the International Academy for Dental Facial Esthetics, and a clinical professor in periodontics at Temple University, Philadelphia.

He is a diplomate of implantology in the International Congress of Oral Implantologists as well as the American Society of Osseointegration, and a diplomate of the American Board of Aesthetic Dentistry.

Hoexter lectures throughout the world and has published nationally and internationally. He has been awarded 11 fellowships, including FACD, FICD and Pierre Fauchard. He maintains a practice at 654 Madison Ave., New York City, limited to periodontics, implantology and esthetic surgery.

Fiscally fit in 2009

Tax breaks and limited-time laws make 2009 the right time to invest in your practice

By Keith Drayer

The American Recovery and Reinvestment Act of 2009 was signed into law on Feb. 17 with some of the best benefits having limited remaining time eligibility.

Small business owners have limited time in 2009 to benefit from the most lucrative tax incentives for acquiring technology and/or equipment.

If your practice is ready to buy equipment or software, the tax incentives for doing so are better than ever. These benefits will expire, or be reduced, as of Jan. 1, 2010.

The American Recovery and Reinvestment Act accompanied by lower interest rates make this a strategic time to invest in your practice to meet the demands of today's health care industry.

Because of these beneficial conditions, installing equipment and technology in 2009 can create a cash flow win-win for health care practitioners "in the know."

Can you deduct \$250,000?

For the 2009 tax year, many small businesses may potentially deduct up to \$250,000 if the equipment or software is placed in service.

This valuable break is the Section 179 depreciation deduction privilege, and it is an exception to the general rule that you must depreciate equipment and software costs over several years.

Section 179 is an annual "use it

or lose it" accelerated deduction benefit that optimally lowers taxable income.

The bonus depreciation is allowable for regular and alternative minimum tax (AMT) purposes for the tax year in which the property is placed in service.

Property eligible for this treatment includes:

- Property with a recovery period of 20 years or less (almost all dental equipment).
- Standard software/practice-management software.

Who can take the deduction?

This deduction is available whether you are a sole proprietorship, partnership or corporation (S corporations are subject to different rules). If you plan to acquire equipment in the near future, purchasing it before year's end is prudent.

What type of financing is eligible?

Utilizing a finance agreement or capital lease to acquire technology or equipment will qualify for this benefit, while true leases or fair market value agreements will not.

If you use a finance agreement to acquire your equipment and you have deferred payments, you may file your tax returns and achieve the benefits before you have made any payments.

Avoid last-minute decisions

Don't wait too long to acquire technology or upgrade your office.

Although it is true that you can

Annual Internal Revenue Code Section 179 Example

Calculations	Equipment not more than \$800,000
A. Equipment price	\$300,000
B. Section 179 deduction	\$250,000
C. 50% bonus depreciation (A - B x 0.50)	\$25,000
D. 2009 MACRS deduction (A - B - C x 0.20)	\$5,000
E. Total first year tax deduction	\$280,000
F. Combined federal and state tax bracket	38%
G. Total 2009 tax savings as a result of capital expenditure (E x F)	\$106,400

Invest in your practice with HSFS

Henry Schein Financial Services (HSFS) business solutions portfolio offers a wide range of financing options that make it possible for you to invest in your practice for greater efficiency, increased productivity and enhanced patient services.

HSFS helps health care practitioners operate financially successful practices by offering complete leasing and financing programs. HSFS can help obtain financing for equipment

and technology purchases, practice acquisitions and practice start-ups.

HSFS also offers value-added services including credit card acceptance, demographic site analysis reports, patient collections, patient financing and the Henry Schein Credit Card with 2% cash back or 1½ points per dollar spent.

For further information, please call (800) 853-9493 or send an e-mail to hsfs@henryschein.com.

have equipment placed in service by Dec. 31 to take advantage of the incentives, waiting too far into the year may mean that you will settle on your selections because of diminished year-end choices.

Now is the right time to meet with an equipment or technology specialist and discuss acquiring the optimal production-enhancing technology and equipment that will help your practice stay fiscally fit.

Don't forget bonus depreciation

Your practice may generally claim

first-year bonus depreciation deductions equal to 50 percent of the cost that is left over after subtracting allowable Section 179 deductions (if any).

If your business uses the calendar year for tax purposes, you only have until Dec. 31 to take advantage of the generous \$250,000 allowance.

Don't wait to see if 2010 will provide the same opportunity. Act now and take advantage of all the benefits available through this current legislative windfall. [DT](#)
