

FDI to welcome the world of dentistry to Australia

| World Dental Congress makes triumphant return to an in-person event in Sydney

Fig 1: FDI is one of the oldest dental organisations and its membership comprises about 200 national dental associations and specialist groups in over 130 countries. **Fig 2:** The internationality of the event is drawn home when FDI member countries display their countries' flags during the rousing flag ceremony, which is part of each congress opening. **Fig 3:** Presentations and posters submitted and reviewed by an expert panel ahead of the congress will be on display in Sydney.

Organised annually by FDI, the World Dental Congress is one of the most prestigious continuing education events in the global dental event calendar. The congress aims to advance the art and science of dentistry, providing a platform for both the dental profession and the dental industry.

Co-hosted jointly with the Australian Dental Association (ADA), the 2023 World Dental Congress will take place at the International Convention Centre Sydney in Australia from 24 to 27 September. The last time Australia hosted the World Dental Congress was in 2003. FDI had initially awarded the congress to Australia for 2021, but the COVID-19 pandemic eventually meant that the in-person event had to pivot online in very short order. It is expected that the 2023 event

will be the largest dental event held in Sydney since the pandemic. It will also replace this year's Australian Dental Congress, which is run by the ADA every two years, drawing between 4,000 and 6,000 dental professionals to the city.

Over the course of four days, this year's congress will offer a cutting-edge scientific programme with more than 220 sessions and interactive forums covering the most relevant topics in dentistry. The programme will feature presentations by the leading figures in dentistry from Australia and abroad. *[See pages 6 to 10 to learn more about speaker and programme highlights.]*

Of particular note will be the inaugural FDI Young Dentists Forum. On 27 September, this new event will gather young dentists

from all over the world to learn about today's hottest topics in dentistry. It will also be a unique opportunity for dental students and professionals who have just started their dental career to find out more about development opportunities within the dental profession, to grow their professional network and to learn about the work done by FDI.

The congress will also host a dental exhibition displayed over multiple halls and involving over 150 exhibitors, keeping dental professionals up to date with the latest advancements in dental products and services. Each day, various industry symposia will be offered in addition to the main scientific programme. *[See pages 10 to 14 to find out more about industry innovations to be presented at this year's congress.]*

In addition, the 2023 FDI World Dental Parliament sessions will be held concurrently with the congress. The FDI Parliament is the legislative body for the world of dentistry, and during its sessions, all FDI member associations come together to discuss, formulate and decide on policies that shape how issues like oral health promotion and general dentistry policy are handled on a global basis.

Pre-congress social events

On 23 September between 6:45 and 16:45 (times are subject to change), the world's first "Tooth and Wicket Cricket" tournament will be held as part of the World Dental Congress social programme. Delegates from around the world will have the chance to compete in what is now the second most popular sport in the world. The organisers have

created a unique indoor tournament based on the popular outdoor game of cricket. Indoor cricket was started in Australia in the 1970s. It is a fast-paced game that takes place on a court surrounded by a net enclosure. The game is suitable for people of all ages. In total, there will be around 12 teams with six to eight players each. This is a complimentary offer to registered delegates of the congress.

On the same day, the official opening ceremony will be held at the convention centre at 18:00. During the festive event, participants can expect a typical Australian welcome, spectacular entertainment and the traditional FDI flag ceremony. Attendance of the opening is included in the registration fee; however, delegates are required to register in advance.

Welcome from FDI President Prof. Ihsane Ben Yahya

I am overjoyed to extend my heartfelt welcome to all of you in vibrant Sydney, where we are gathering for a face-to-face World Dental Congress after four long years. This event is particularly meaningful to me, as it marks both my first and my final in-person WDC as president, making it truly special.

I encourage you to make the most of your time at this WDC, actively participate in the scientific sessions, engage with your peers and explore the interactive exhibition. Take advantage of the opportunities presented to you, and let this congress serve as a catalyst for personal and professional growth.

Together, we share a vision to elevate oral health on a global scale, and the WDC is more than just a knowledge-sharing platform. It is a joyous celebration of the collective achievements of the dental community. Let us revel in the accomplishments we have made and remain united in our pursuit to make even greater strides.

Throughout the congress, we have thoughtfully planned various social events and gatherings to foster deeper relations. These moments of connection and celebration are vital for nurturing the sense of community and collaboration that is at the heart of our profession.

Thank you for joining us at this extraordinary event. I wish you a productive, inspiring and memorable WDC.

FDI awards: Honouring efforts to promote oral health

Promoting the significance of maintaining good oral health and driving change necessitates the collective efforts of numerous individuals, dental practices and national dental associations worldwide. Acknowledging the profound influence of these remarkable initiatives, FDI gives prestigious awards and grants to commend outstanding contributions. Learn how you can get involved.

FDI Smile Grant

The FDI Smile Grant is a CHF 5,000 grant which recognises FDI member national dental associations that are making a difference in oral health through innovative and sustainable community outreach projects in their countries.

The grant is open to any FDI regular or associate member. It is designed to reward projects that have been actively rolled out for at least one year and that will continue for at least one year more. Eligible projects may address any oral health issue and/or disease and must have a strong focus on oral health education, oral health promotion and oral disease prevention.

The award is given to two applicants for their original projects and has an application submission deadline of 1 February each year. In 2023, the awards ceremony will take place during the FDI General Assembly on 22 September at the WDC. Applications for the FDI Smile Grant are accepted year-round.

More information can be found at fdiworlddental.org/fdi-smile-grant.

FDI Sustainability in Dentistry Awards

Recognising the importance of sustainability in dental practice, the FDI Sustainability in Dentistry Award honours sustainability champions and provides global recognition for their efforts. Dental teams and individuals who have successfully implemented sustainable initiatives within their practices are invited to apply for this prominent award.

This year marks the inaugural presentation of the award. Each year, four awards will be granted: two for dental teams, each receiving CHF 1,000, and two for individuals, each receiving CHF 500.

You are invited to attend the sustainability in oral healthcare session on 25 September to learn about the remarkable initiatives undertaken by dental professionals to improve the impact of dentistry on the planet. More information can be found at sustainability-platform.fdiworlddental.org/sustainability-award.

World Oral Health Day Awards

FDI relies on the power of local and national campaigns to realise the World Oral Health Day (WOHD) campaign globally. On 20 March each year, the world mobilises to celebrate WOHD through hundreds of events organised around the world. Driven

Save the dates

- 22 September FDI Smile Grant award ceremony
- 24 September WOHD launch event
- 25 September Sustainability in oral healthcare session

by a common goal to reduce the burden of oral disease, the oral health community comes together consistently to organise free dental check-ups, school activities, educational lectures and more—all in honour of WOHD.

FDI commends the hard work of WOHD enthusiasts across the world and, in recognition of these valued efforts, gives out the World Oral Health Day Awards every year. The awards are divided into six categories that reward the work of FDI members, students and the public. Get involved in the 2024 campaign, and find out how you could win an award by visiting the WOHD website, worldoralhealthday.org.

The WOHD awards will be presented at the WOHD launch event in Sydney on 24 September. Make sure to join the session to learn about the diverse WOHD celebrations.

More information can be found at fdiworlddental.org/world-oral-health-day-awards.

New strategy for WOHD to be revealed at World Dental Congress

| A conversation with Dr Anna Lella, World Oral Health Day task team chair

Fig 1: Dr Anna Lella is a periodontist and the past president of the European Regional Organization of FDI. **Fig 2:** FDI president Prof. Ihsane Ben Yahya at a WOHD event organised by the Indonesian Dental Association and Pepsodent in Jakarta.

Celebrated every year on 20 March, World Oral Health Day (WOHD) is the largest global awareness campaign on oral health. The WOHD task team oversees the development and implementation of the campaign strategy. Dr Anna Lella from Poland is the task team's chair, and she talks about the initiative's significance and strategic plans for the upcoming years in this interview.

What is the main mission of WOHD, and why does it matter on a global scale?

WOHD is an initiative of the global community of dental practitioners who want to assist their patients not only by providing them with individual treatment, but also by raising social awareness of the importance of maintaining good oral health.

WOHD is a worldwide celebration held with a significant mission: to empower people with the knowledge and tools to prevent and control oral diseases. These diseases have a significant impact on people's lives and are a major health concern in many countries, affecting nearly 3.5 billion people worldwide. They

cause pain, discomfort, social isolation and loss of self-confidence and are often connected to other serious health problems. However, the good news is that most oral health conditions are largely preventable and treatable when addressed early on. This is why we as dentists put so much emphasis on prevention.

WOHD encourages individuals to prioritise their oral health through a good oral hygiene routine and by managing risk factors. By preserving oral health, not only do we do good to our mouths, but also we contribute to our overall health and well-being.

Could you tell us more about the campaign's global impact?

Since its launch in 2007, WOHD's reach and impact have significantly grown, thanks to the invaluable engagement of FDI, the national dental organisations and individual dentists worldwide. Three years ago, FDI kick-started the Be Proud of Your Mouth campaign, motivating people to value and care for their oral health. This powerful call to action encouraged individuals to place an ornate art frame over their mouths using

the different #MouthProud tools available online and on social media, symbolising their commitment to prioritising oral health.

Through this campaign, we hoped to motivate people to value and take care of their mouths and understand that, by doing so, they can also help protect and improve their general health and well-being. The response was incredible! Thousands of people worldwide got involved through events organised by dental associations, specialist groups and the wider healthcare community. More than 26,000 proud mouths were shared across various online platforms, 223 countries and territories got involved and the average media reach was four billion.

Thanks to this tremendous engagement, we made a significant impact and were able to successfully wrap up the Be Proud of Your Mouth campaign.

What are the plans for the future of WOHD?

The campaign's growth has been truly remarkable. As we move forward,

our challenge is to capitalise on this momentum and create a lasting impact over the next three years. Our mission remains clear: to take meaningful action towards ending the neglect of global oral health.

To achieve this, FDI has developed a new strategic approach for WOHD 2024–2026. This approach aims to increase engagement across various stakeholder groups and inspire as many people as possible to prioritise their oral health. We have taken into account valuable campaign insights, advancements in the digital and global health domains, and feedback from FDI members, campaign organisers and partners.

The campaign strategy will be unveiled during the WOHD launch on 24 September at the WDC in Sydney.

How can individuals actively participate in WOHD and support its objectives?

FDI relies on individual action worldwide to roll out WOHD in each country and to create a truly global movement. We encourage you to use your local expertise to create

awareness and roll out the campaign in your community. Whatever you decide to do—however big or small—contributes to improving the oral health of populations globally.

You can get involved in a way that best suits you! Visit our main website at www.worldoralhealthday.org for inspiration and tailor-made ideas to celebrate. Everyone's actions will help to keep us moving towards our collective goal: better oral health for all. Download our campaign materials to support your WOHD activities and events. All resources are free to download and use, and most are available in English, French and Spanish. Of course, you can also arrange translation of selected materials into your national or local languages. We have a wide range on offer.

Stay tuned as we develop new resources for the next three-year campaign. The first ones will become available in October. New resources will be added throughout the campaign, so check back regularly to access all the materials and celebrate WOHD with us.

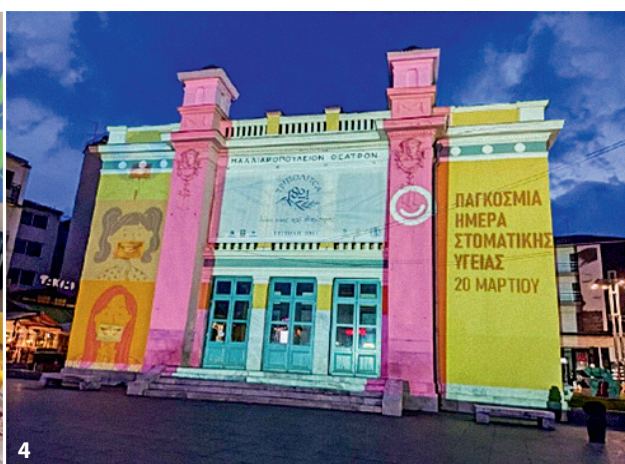

Fig 3: Award winners 2022: WOHD award winners 2022. **Fig 4:** In 2022, the Hellenic Dental Association projected the WOHD logo on several buildings. **Fig 5:** The Palestinian Association of Dental Students made a huge impact on Facebook, Instagram and Twitter in 2022. They shared photos and stories of their WOHD activities with their WOHD reel on Instagram gaining nearly 5,000 views.

Prof. Bill Scarfe, US

Prof. Scarfe studied at the Adelaide Dental School, graduated from the University of Adelaide in Australia in 1982 and was awarded a fellowship in the Royal Australasian College of Dental Surgeons in Sydney in Australia in 1986. After completing a certificate in dental diagnostic science and a master's degree at the Graduate School of Biomedical Sciences at the University of Texas Health Science Center at San Antonio in the US in 1992, Prof. Scarfe joined the faculty staff at the University of Louisville in the US. He is a diplomate of the American Board of Oral and Maxillofacial Radiology and the current scientific editor of the oral radiology section of Oral Surgery, Oral Medicine, Oral Pathology and Oral Radiology, and he is on the editorial board of *Angle* and the *Australian Dental Journal*.

A former treasurer of the American Academy of Oral and Maxillofacial Radiology and a past vice president of the International Association of DentoMaxilloFacial Radiology, Prof. Scarfe has published extensively on CBCT imaging, including recent consensus statements on general, implant, endodontic and orthodontic use guidelines. He has presented internationally as well as nationally and is active in research on the clinical applications of CBCT imaging.

Prof. Georgios Romanos, US

A graduate of the National and Kapodistrian University of Athens in Greece, Prof. Romanos received advanced training in periodontics, prosthodontics and oral surgery in Germany and the US. Today, he is a full professor at the Department of Periodontics and Endodontics at Stony Brook University in New York in the US.

He was the president of the Academy of Osseointegration's Osseointegration Foundation in 2018 and 2019 and the president of the International Association for Dental, Oral, and Craniofacial Research's Implantology Research Group in 2019 and 2020. Prof. Romanos is a fellow of several leading scientific and research societies, including the American Association for Dental, Oral, and Craniofacial Research, International College of Dentists, International Congress of Oral Implantologists, ITI Foundation and Pierre Fauchard Academy.

Prof. Romanos is involved in a number of global educational and research activities and has served as a visiting professor in Brazil, Italy, Spain, Malaysia and the US. He is the author of more than 450 publications and is editor or co-editor of seven books. He has given more than 700 presentations in over 50 countries worldwide. He is also the recipient of many scientific awards.
